

INTERNAL DOCUMENT: WP3 STUDY VISIT ASSIGNMENT REPORT

Study visit dates: 21-22-23 May 2018

Study visit location: Bologna, Emilia-Romagna, Italy

HEI responsible: Department of Agricultural and Food Sciences, ALMA MATER STUDIORUM, University of Bologna

Persons in charge for organization:

Francesco Orsini

Giuseppina Pennisi

Introduction

Study visits and trainings (Deliverable 3.2.) are three days events organized at program HEIs according to the proposed modules, specific typology of Urban Agriculture as well as results/guidelines/experience from Project. Six study visits with training for five participants from five HEIs will deliver 150 trainings. Study visits and training aims to equip teaching staff from partner HEIs with first-hand experience in Urban Agriculture (UA). During study visits teaching staff will visit UA sites and project at program HEIs. During that time they will practically implement UA skills and knowledge in real work surroundings, or otherwise gain first-hand experience needed for BUGI Project curriculum implementation. Partner HEIs teaching staff will work closely with program HEIs teaching staff to facilitate knowledge transfer and good practice. The emphasis will be placed on teachers training that foster interactive, problem-based learning and entrepreneurial skills through new and creative ways of teaching and learning. New methodological approaches exercised by the teachers will enable them to work independently in implementation of new curriculum and LLL programs.

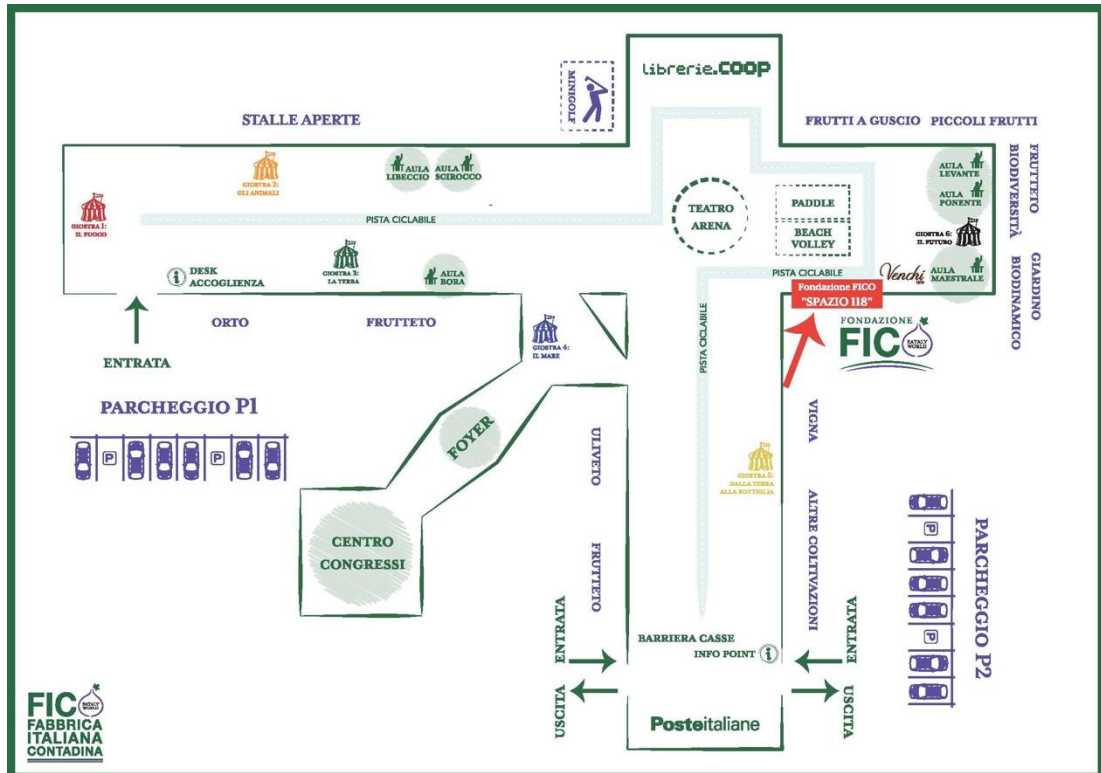

Study visit assignment

The aim of the study visit and training was to equip teaching staff from partner HEIs (University Dzemal Bijedic of Mostar, University of Donja Gorica, University of Haxhi Zeka, University of Prishtina, University Sarajevo, South-Westphalia University of Applied Sciences, Department of Agriculture) with first-hand experience in UA in the Urban Area of Bologna, Italy, with the purpose to facilitate knowledge transfer and good practice of UA to support BUGI Project curriculum implementation.

The objectives of the study visit and training were to:

.

- Gain an insight in the **organisation of the World largest food park (FICO)** 20,000 sqm of Italian biodiversity in Bologna– discover the world’s largest agri-food farm! Two whole hectares dedicated to demonstrative fields and stables with more than 200 animals and 2000 different cultivars.

- Gain an insight in the organisation of the Scuderie Future Food Coolab, an innovative food scenario combining “eating” – “food cultures” and “science” and innovation with its three laboratories (food alchemist, food maker and urban farmer)
<http://scuderia.futurefood.network/>
- Learn about the results of a pluriannual research on “Sustainability assessment of innovations in urban agriculture” carried out by Esther Sanyé-Mengual (DISTAL).
- Gain an understanding of the Spazio Battirame - Cooperativa sociale Eta Beta: Eta Beta is a social cooperative that offers therapeutic and rehabilitative programs and work placement services for disadvantaged people and/or those in marginal situations, based on handicraft, artistic and agricultural activities. Eta Beta was founded in 1992 by an association of artists and artisans located in Bologna (IT). In 2013 Eta Beta started an innovative project in a former industrial area within the city of Bologna (Roveri), aimed at revitalizing the area, now almost totally abandoned, as well as at promoting social inclusion and realizing a sustainable food chain based on social and ethical values. Among the different activities Eta Beta performs, one of the most relevant is

Co-funded by the

of the European Union

the cultivation and sale of organic vegetables targeted to the Bologna ethical purchasing group (Gruppo d'acquisto solidale Bologna – GASBO <http://www.gasbo.it/>) and more in general to families from the Bologna area (approximately 80/100 families)

KEY ACTIVITIES: Handicraft and artistic activities such as woodworking, carpentry, jewellery, ceramic and glassware are essential elements of the rehabilitative programmes run by Eta Beta, as well as means for social inclusion and work –based training and job placement. At the headquarters in Via Battirame in Bologna, they produce and distribute organic food such as fruit and vegetables with an agricultural area of 2150 square meters. The garden of Via Battirame is located on the premises of the cooperative and was built as a circular garden following the principles of biodynamic/synergistic agriculture. Now the productive area has been expanded on an additional field located in the same area.

Study visit outcomes

During the study visit and training the participants:

Visited the World largest Food Park

Visited 3 practical examples of innovative and viable UA grassroots initiatives involving multiple stakeholders (governmental and non-governmental actors, civil society and SMEs)

Got first-hand information from a researcher who is one of the leading experts in sustainability of UA.

Usefulness for acquiring new skills

□ Rather good, with only one person disappointed!

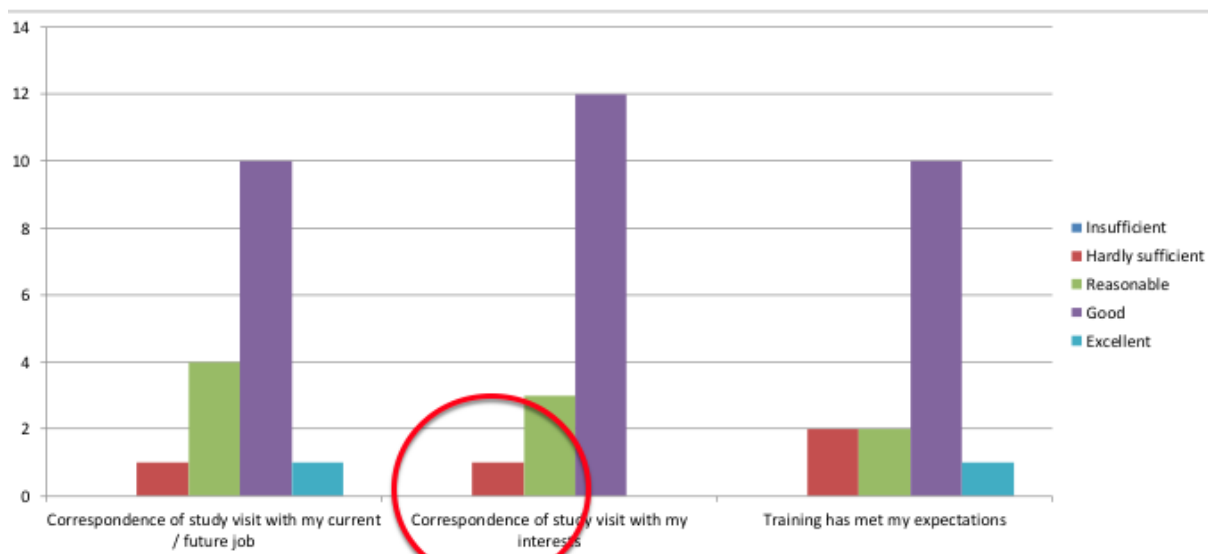

Fig. 3

Organisation of the training event

□ The location of Day 2 was too noisy!!!

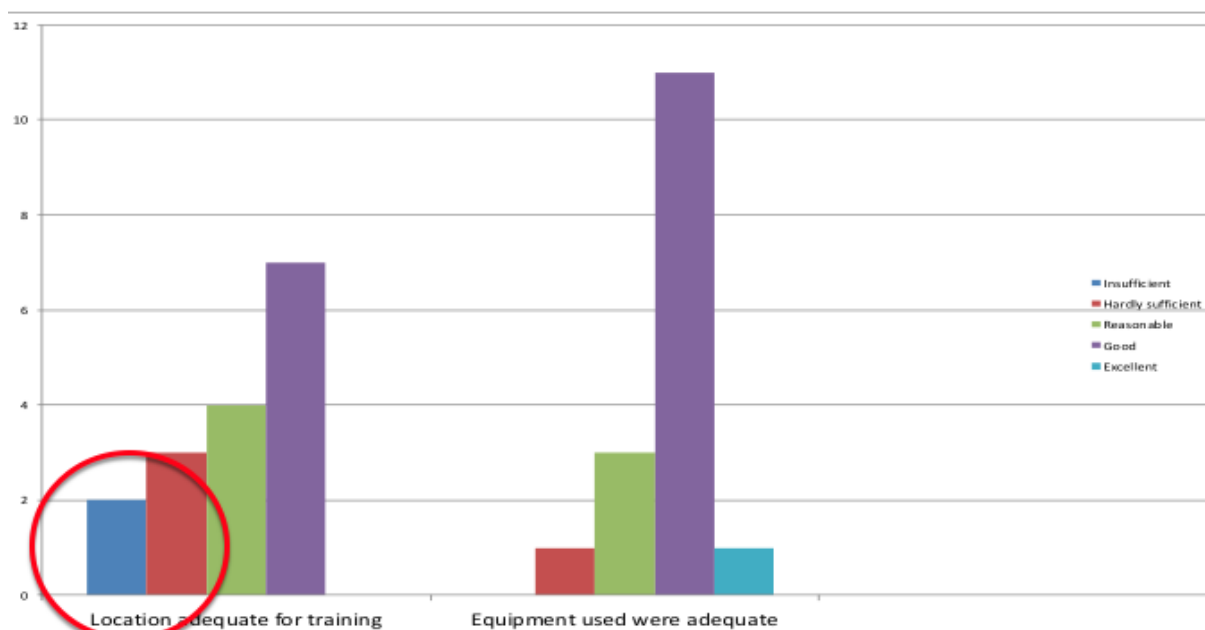

Fig. 4

Participants' Opinion: The Con's

1. Training room on the second day was too noisy
2. Translate materials from Italian to English
3. Activities should be finished by 5pm
4. Good ideas but bad realization
5. Case Study on second day was too long, and not clearly related with Urban Agriculture
6. Meeting locations were hard to be found
7. It was unpolite to force people pay for expensive lunches
8. Hosting university should not ask participants pay for visiting the selected locations
9. Not clear how we can adopt these modules in BiH

Suggestions for doing it better

- Improve quality of organisation
- Spent more time for organising better the visits

- Participants should be selected according to the planned topics for lectures
