

# Rast i razvoj Urbane poljoprivrede

NASTAVNA JEDINICA: Ekonomski aspekti urbane poljoprivrede

Alen Mujčinović & Aleksandra Nikolić  
Univerzitet u Sarajevu, Poljoprivedno-prehranebni fakultet

Oktobar, 2021.

# Pitanje za učesnike

- Šta je po vašem mišljenju urbana poljoprivreda?
- <https://www.menti.com/1rgx6ta77o>
- Kojom od aktivnosti urbane poljoprivrede bi se voljeli baviti?
- <https://www.menti.com/1rgx6ta77o>

Molim vas da razmislite o navedenim pitanjima, tako da u toku nastave možemo o ovome razgovarati, te ujedno te odgovore iskoristiti za planiranje vježbe kada se budemo našli uživo.

# Sadržaj prezentacije

## PREHRAMBENI LANAC VRIJEDNOSTI (FVC)

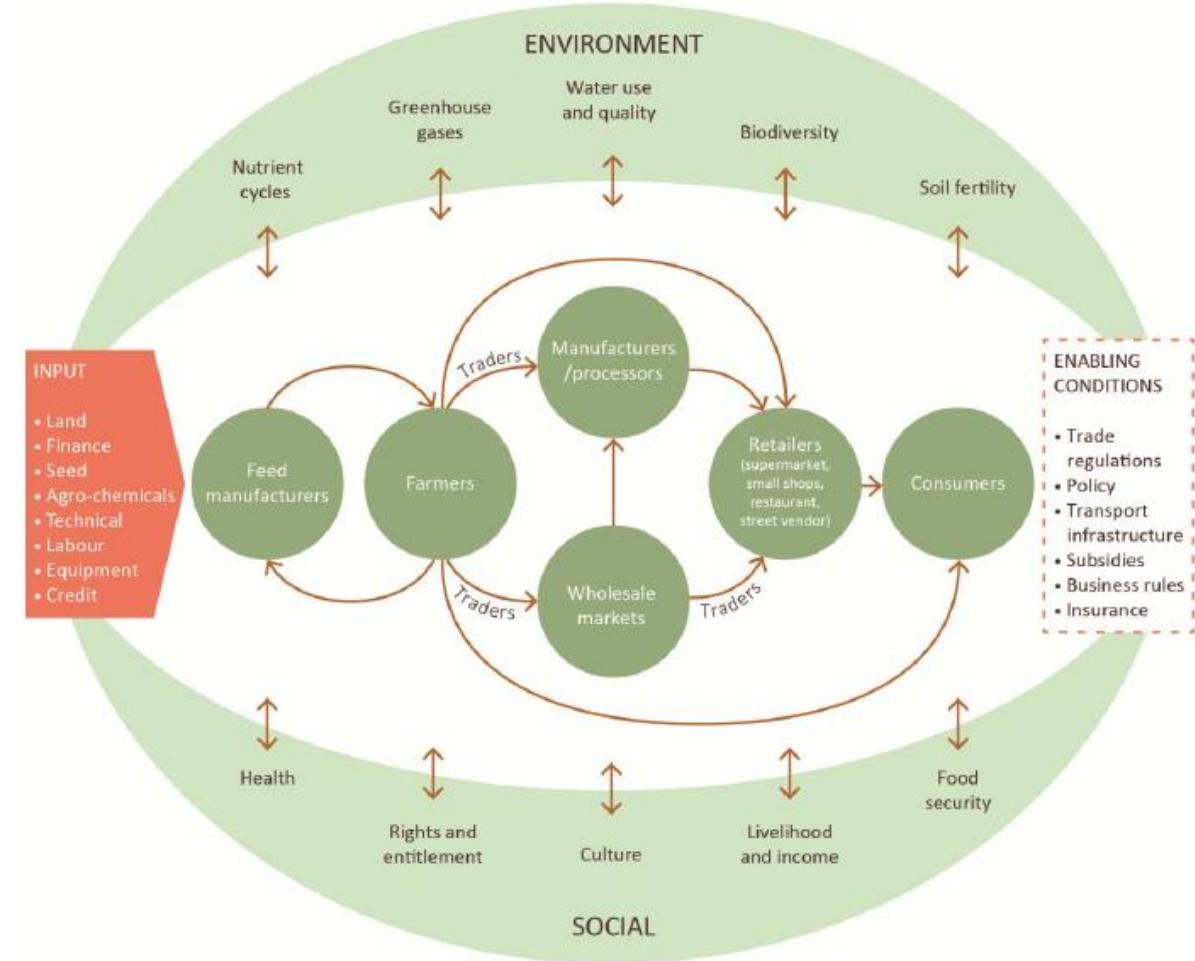

Šta je to lanac vrijednosti poljoprivrednih i prehrambenih proizvoda?

Sve aktivnosti uključene u proizvodnju proizvoda od „njive do trpeze“ ali i aktivnosti koje su vezane za pripremu, konzumaciju hrane, te otpad koji nastane u procesu konzumacije i pripreme hrane.

Šema 1. Prehrambeni lanac vrijednosti – pojednostavljena forma

| Seeds            | Farmers   | Aggregators   | Distributors | Retailers    | Consumers |
|------------------|-----------|---------------|--------------|--------------|-----------|
| Pesticides       | Ranchers  | Processors    | Importers    | Supermarkets |           |
| Agbiotech Traits | Fishermen | Manufacturers | Exporters    | Restaurants  |           |
| Fertilizers      |           | Beverages     |              |              |           |

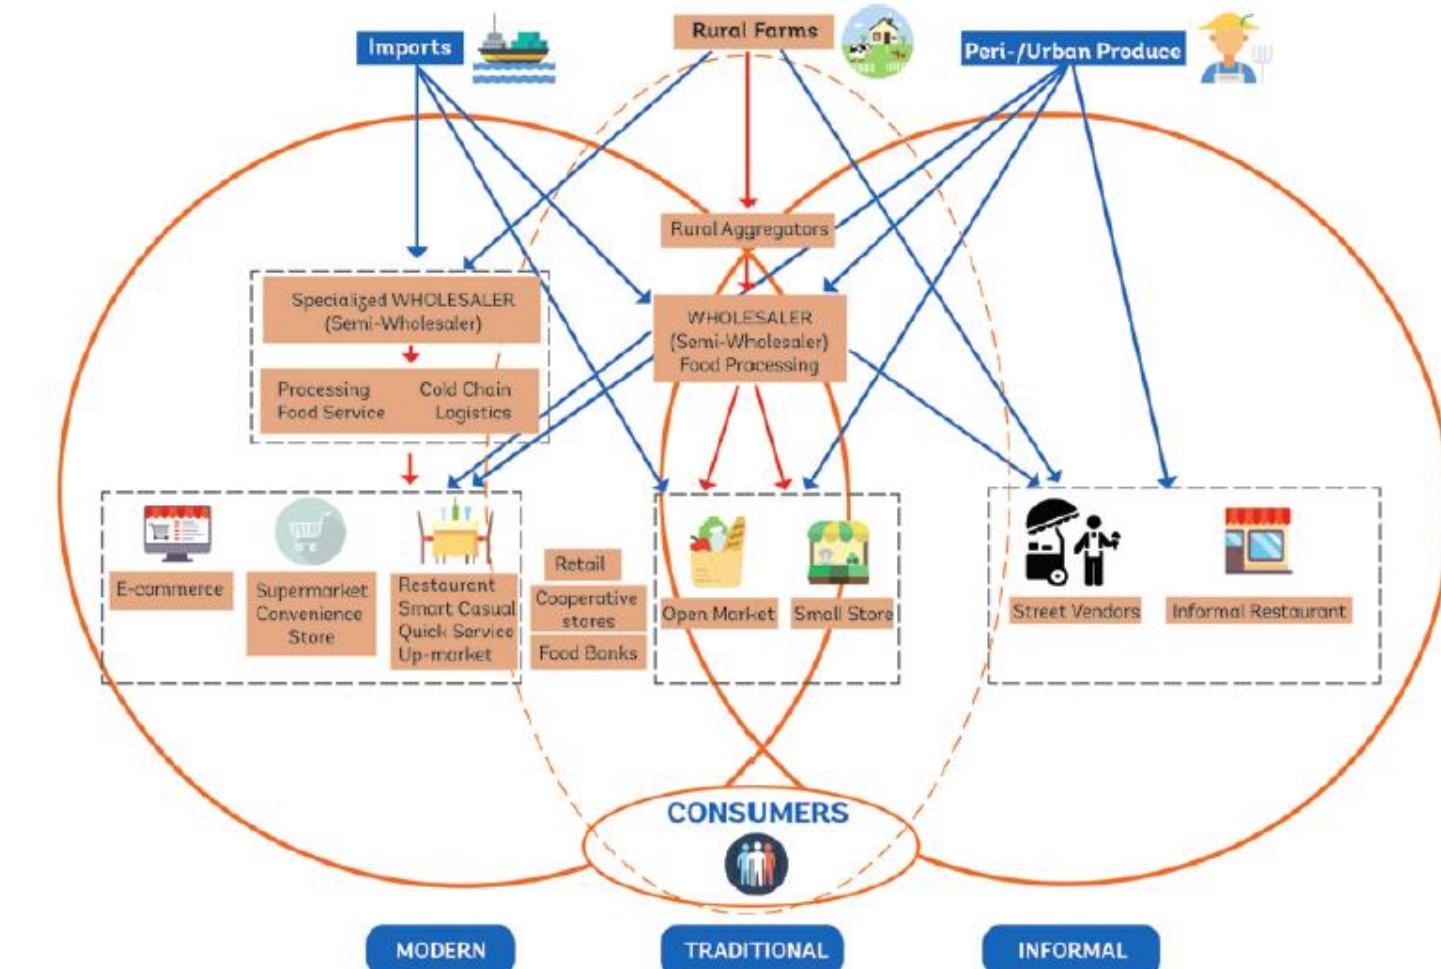

Šema 2. Prehrambeni lanac vrijednosti – proširena forma

## PREHRAMBENI LANAC VRIJEDNOSTI (FVC)

Šta je to lanac vrijednosti poljoprivrednih i prehrambenih proizvoda?

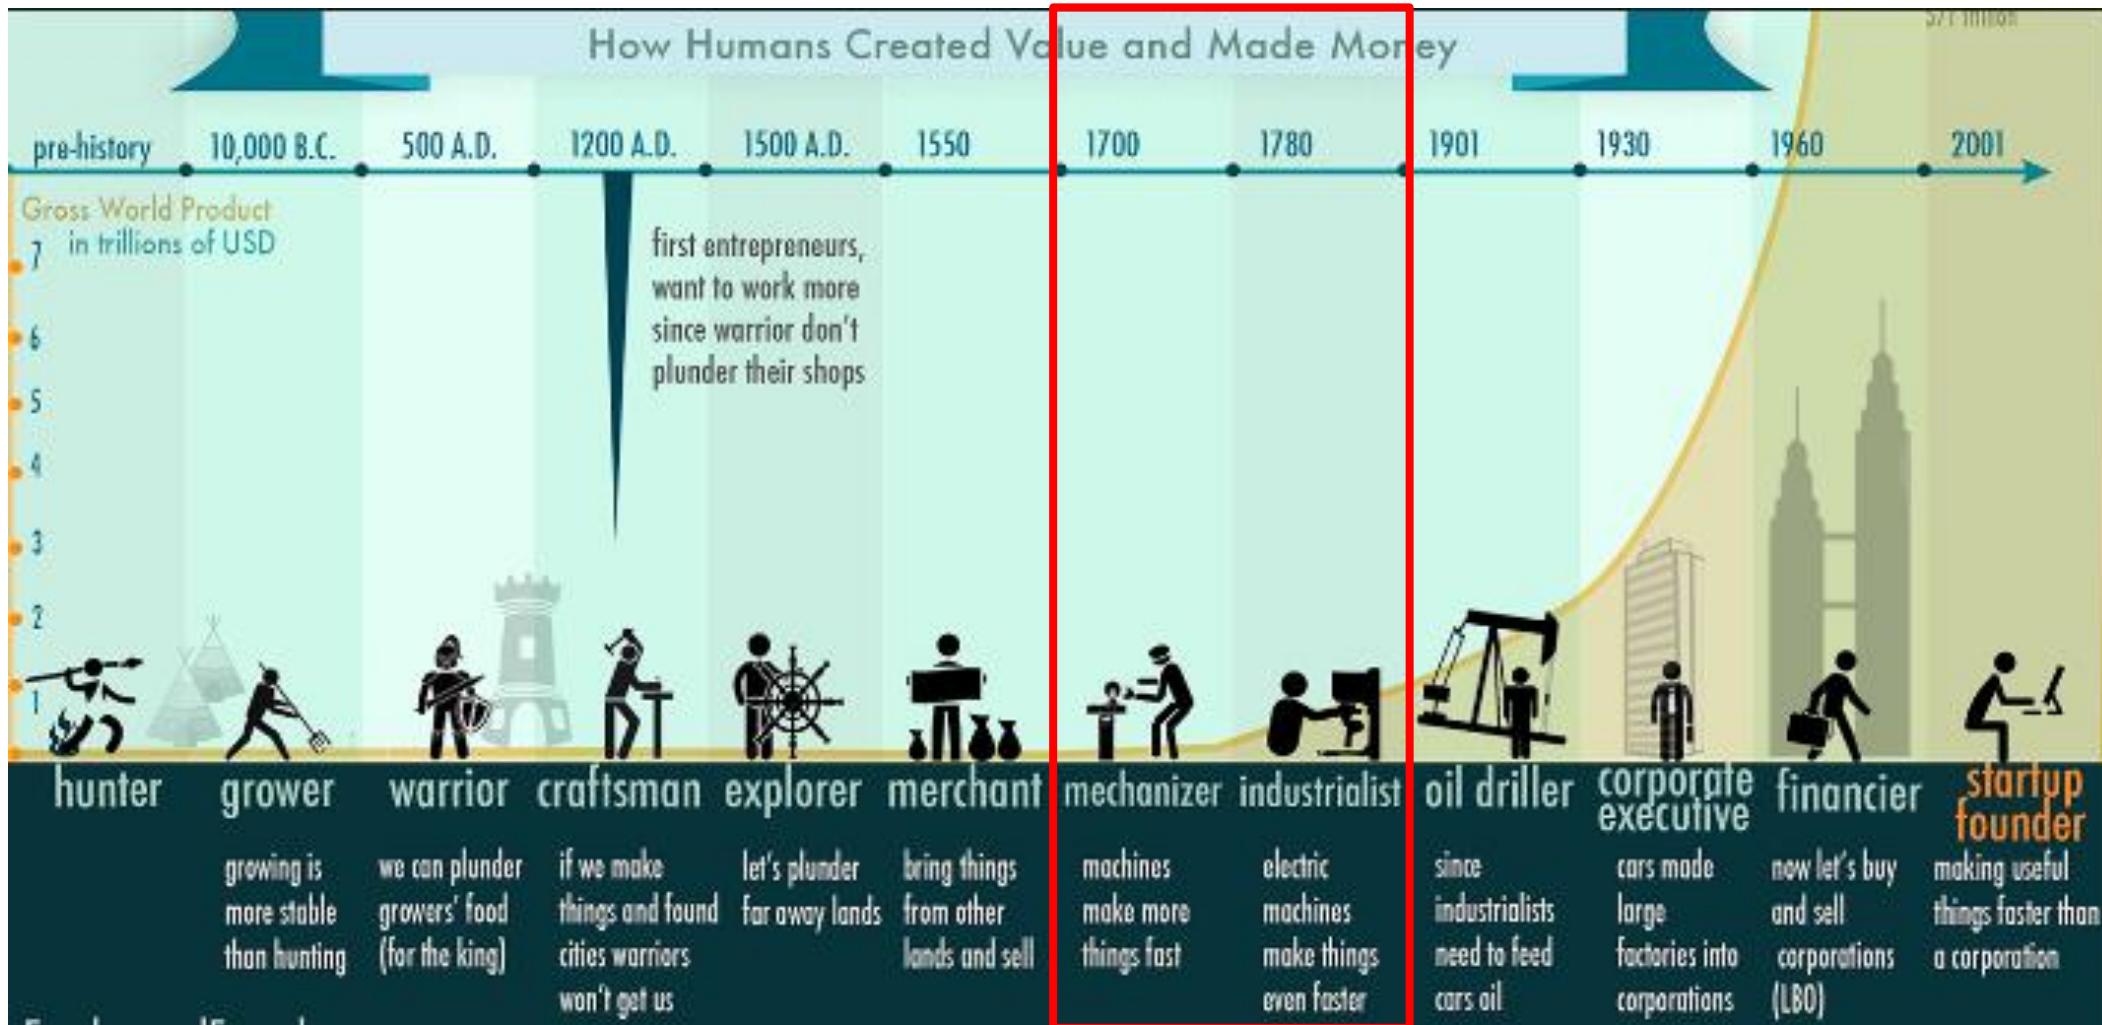

Sve aktivnosti uključene u proizvodnju proizvoda od „njive do trpeze“ ali i aktivnosti koje su vezane za pripremu, konzumaciju hrane, te otpad koji nastane u procesu konzumacije i pripreme hrane. – **ALI I MNOGO VIŠE (šema 3)**

# GLOBALNI PROBLEMI – GUBITAK I OTPAD OD HRANE

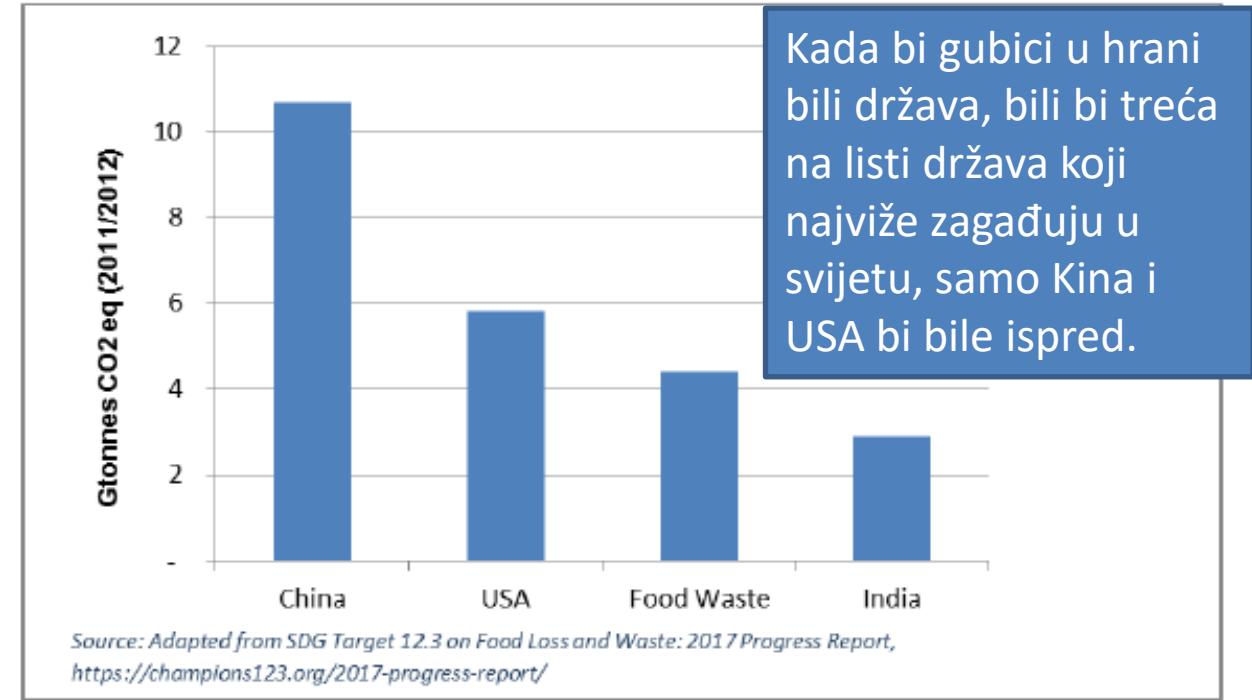

Izvor: WEF (2012) Driving Sustainable Consumption, World Economic Forum, dostupno na:  
[http://www3.weforum.org/docs/WEF\\_ENV\\_SustainableConsumption\\_Book\\_2013.pdf](http://www3.weforum.org/docs/WEF_ENV_SustainableConsumption_Book_2013.pdf) pristupio: 20.10.2018. godine

# GLOBALNI PROBLEMI – GUBITAK I OTPAD OD HRANE

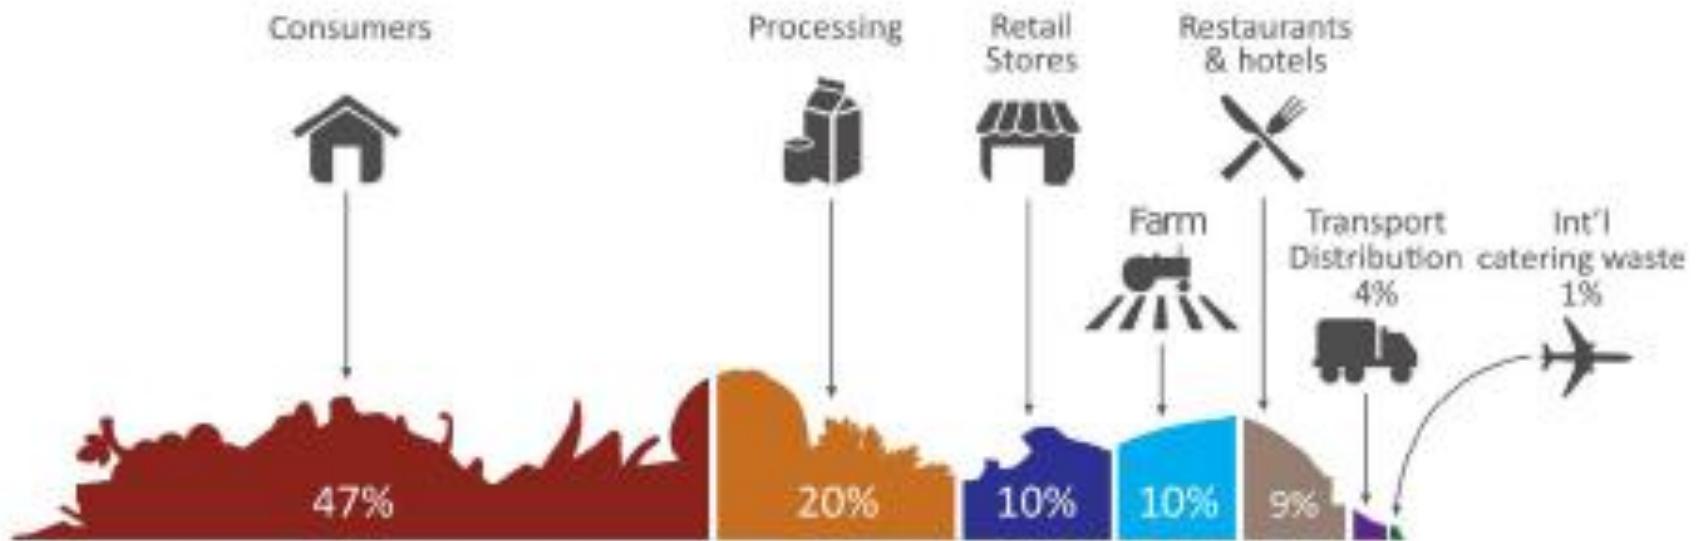

Nearly one third of all food produced for humans each year is wasted or lost. This **1.3 billion tonnes of food** is worth a total of nearly **US\$ trillion**. This wasted food takes an area larger than China to produce, and uses **25 per cent of the world's water supply**. If food waste was a country, it would be the third largest emitter of GHGs, after China and the USA. Along with roots and tubers, fruit and vegetables have the highest wastage rates; nearly half of all those produced are wasted. **Global losses for fish and seafood are 35 per cent, 30 per cent for cereals, 20 per cent for nuts and pulses and 20 per cent for meat and dairy.**

Šema 9. Globalna emisija stakleničkih gasova - vizuelizacija

# GLOBALNI PROBLEMI – GUBITAK I OTPAD OD HRANE

Šema 10. Gubici hrane u Kanadi

Bread, fruit and vegetables are the most commonly disposed of food items in the UK. Indeed, in 2017 the UK created **7 million tonnes of food waste**, costing the **average household £470 per year**. A staggering 1/3 of food produced is lost at various points throughout the food chain and yet it is estimated that over 2 million people are malnourished in the UK.

In Europe and North America consumers discard between **95-115 kg** annually, compared to **6-11 kg** in sub-Saharan Africa and south-eastern Asia.

# GLOBALNI PROBLEMI – POTROŠNJA VODE

Despite more than two thirds of the world's surface being covered in water, only 3% of this is fresh water, and 1% of this is available for human consumption. Water scarcity is a global burden, with 1.1 billion people lacking access to sufficient, clean water and food production accounts for 70% of global water usage.

## ALTERNATIVNI LANCI VRIJEDNOSTI – KORISTI/PRILIKE

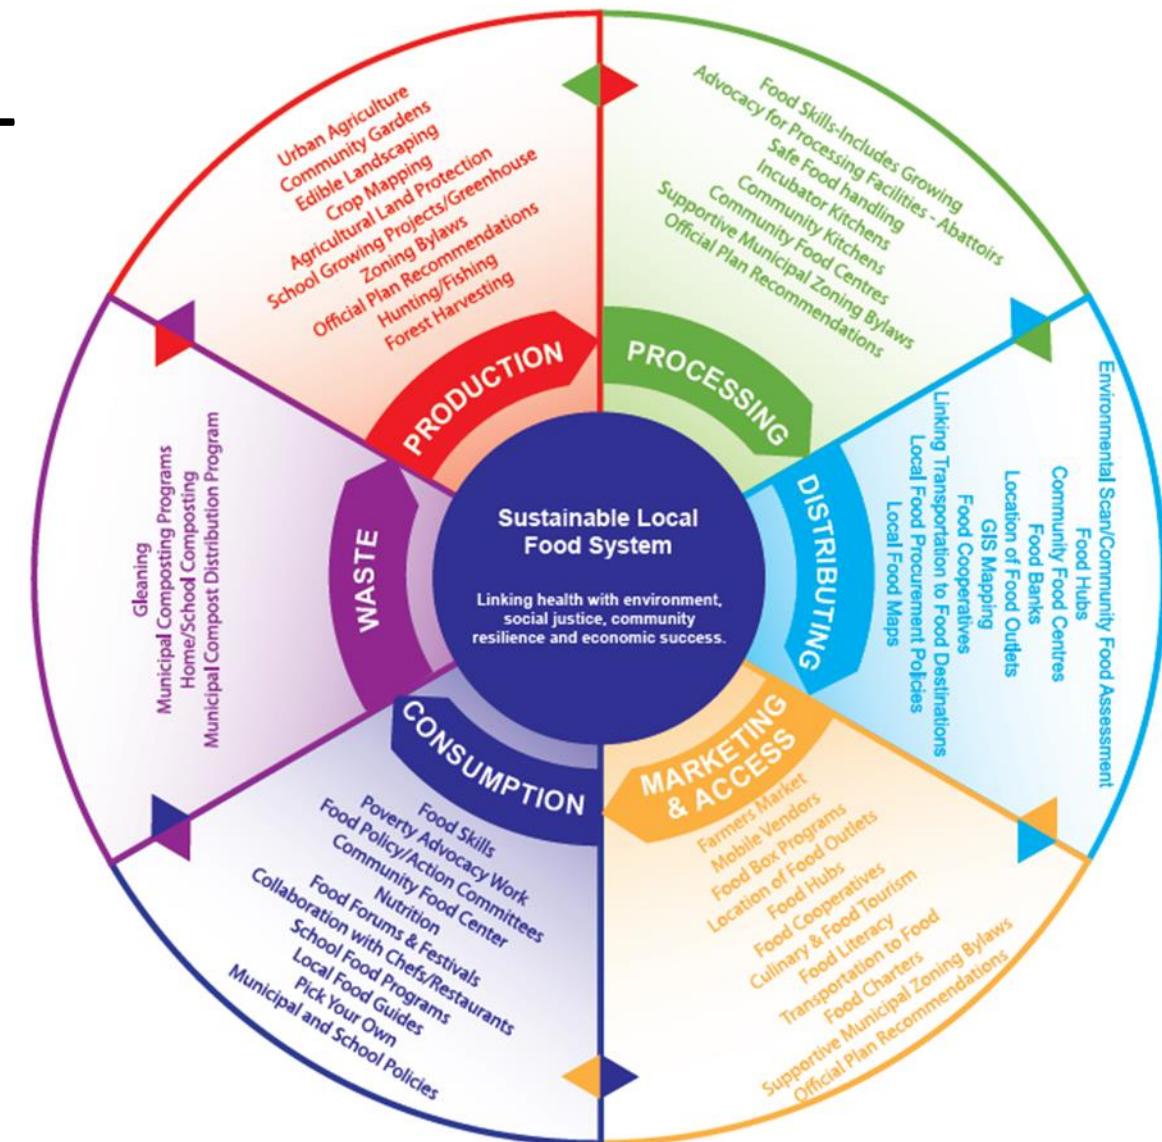

**Tabela 4.** Koristi od razvijenih alternativnih lanaca hrane

| Theme                  | Proposed benefits  |
|------------------------|--|
| Food security          | Increased livelihood resilience for small-scale producers  |
|                        | Reduced food prices for urban consumers  |
|                        | Increased resilience of urban food supply against shocks   |
| Economic development   | Regional economic growth   |
|                        | Increased rural incomes and jobs   |
|                        | Economic vitality, entrepreneurship and innovation   |
| Environment            | Opportunities for 'circular economies', including reduced food waste and loss                        |
|                        | Increased local agroecological diversity   |
|                        | Increased recognition and valuing of ecosystem services  |
|                        | Lower greenhouse gas emissions   |
| Health                 | Increased knowledge about food and nutrition amongst urban dwellers, resulting in more healthy diets |
|                        | Increased availability of, and access to, nutritious food  |
| Governance and culture | Promoting a food culture   |
|                        | Integrated ('joined-up') policy and action   |
|                        | Greater participation in and transparency of the food system   |

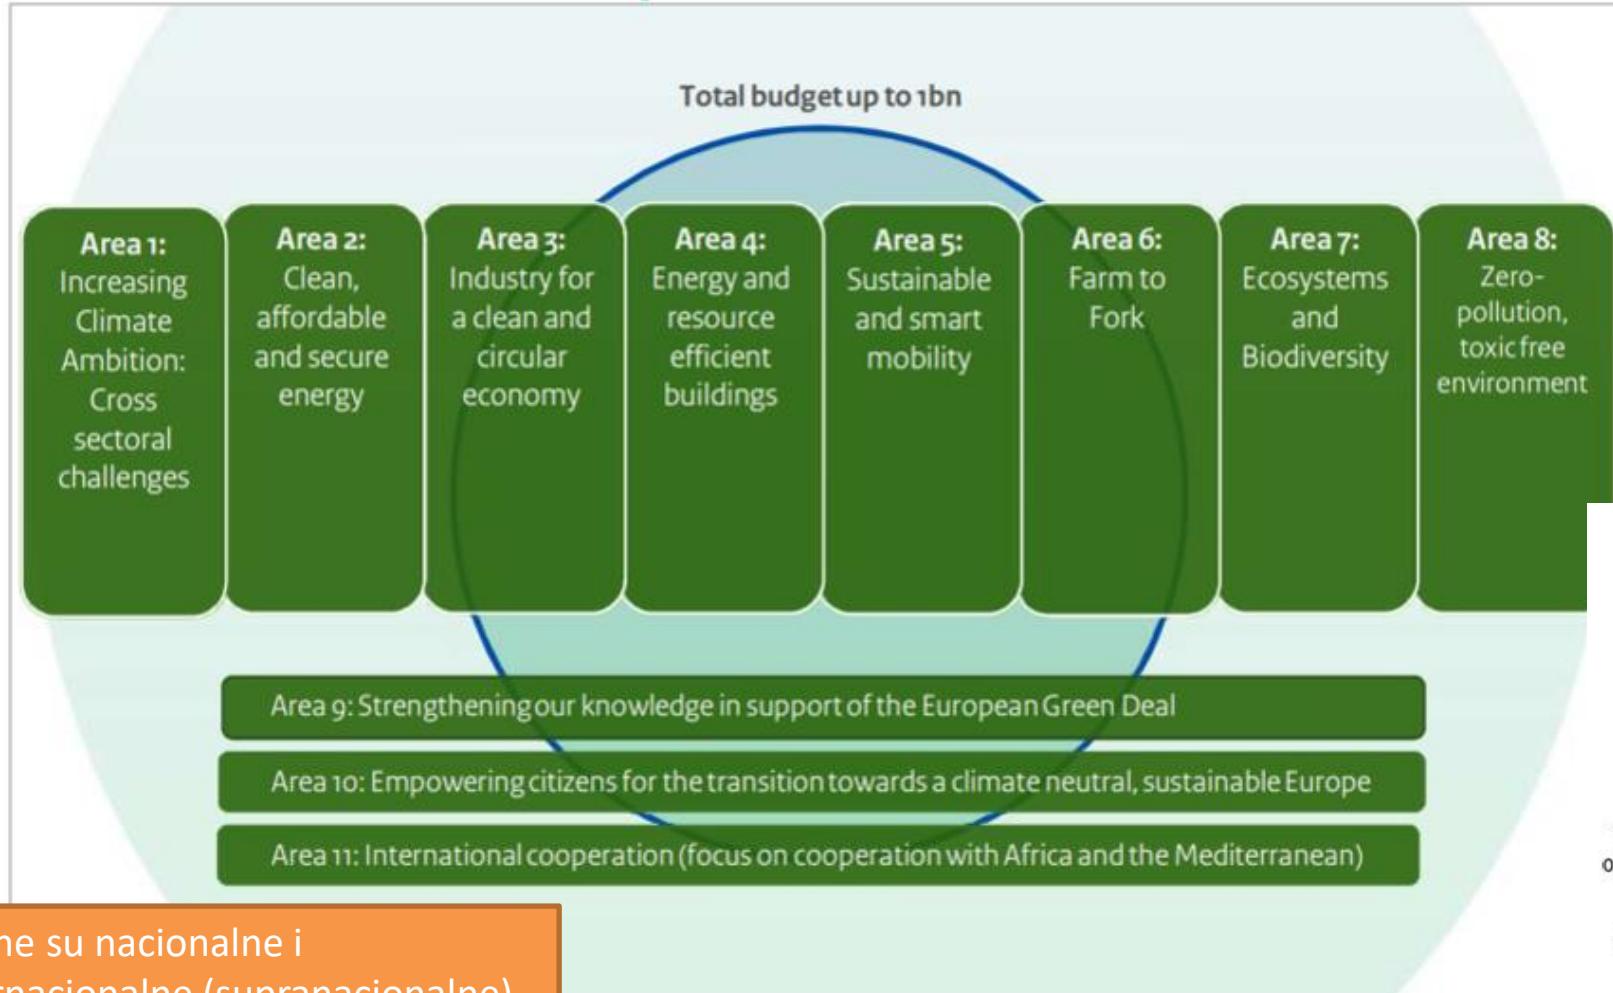

## ALTERNATIVNI LANCI VRIJEDNOSTI – KORISTI/PRILIKE

Brojne su prednosti koje nastaju kao rezultat razvijenih alternativnih lanaca hrane (ovdje se misli i na proizvodnju i distribuciju i potrošnju hrane), a samo neke od najvažnijih su prikazane na Šemi 19.

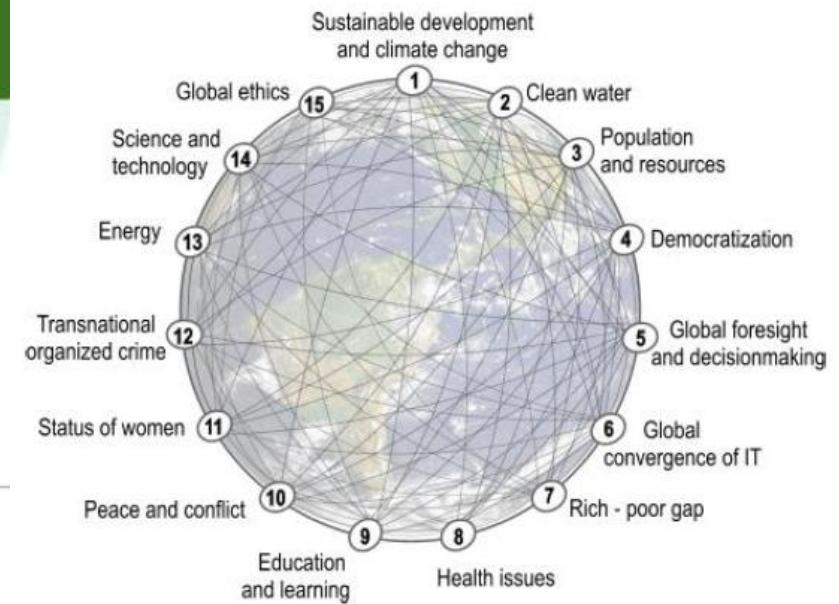

Šema 19. Koristi/prilike za razvoj alternativnih lanaca hrane

## The European Green Deal Call

Brojne su nacionalne i internacionalne (supranacionalne) inicijative pokrenute koje se bave pitanjima održivosti.

## GLOBALNO PREPOZNATI PROBLEMI

# **URBANA POLJOPRIVREDA – odgovor na probleme urbanih regija**

# URBANA POLJOPRIVREDA - DEFINICIJE

- ◆ *Agricultural scientists* work on food production, agricultural systems and rural livelihoods, trying to balance increased output with maintenance of the land's capacity. Their expertise has underpinned the farm revolution of the last century and a half but increasingly they pay attention to the social dimensions of primary food production.<sup>5, 6</sup>
- ◆ *Anthropologists* analyse food as culture, a set of meanings, shared or otherwise.<sup>7, 8</sup> Contemporary Western society's approach to food is deciphering, through its meals and consumption.<sup>9–13</sup>
- ◆ *Biologists and bio-chemists* explore food as a combination of chemical and biological features, which can be well or badly managed, yielding improvements or failures to achieve potential. From Justus von Liebig's creation of fertilizers and beef extract to Gowland Hopkins' discovery of vitamins and the 21<sup>st</sup> century mapping of the genome, biological science's contribution to food policy has been hugely influential.
- ◆ *Economists* build on the two century-old analysis and political arguments of Adam Smith and David Riccardo that food is a traded commodity where markets can either work well or be bent to suit vested interests.<sup>14</sup> Their focus is on making markets more efficient, mostly through price mechanisms,<sup>15</sup> but not always.
- ◆ *Environmental scientists*, rather like food policy, draw widely from different disciplines, bringing a focus on food's reliance and impact on the environment. Its influence on food policy grew rapidly with concerns about climate change, biodiversity, conservation, water shortage and population growth. Notions of carrying capacity and ecological survival now have high policy currency,<sup>16</sup> as has the kudos of scientists pooling knowledge to lever governmental action and policy change.<sup>17, 18</sup>

- ◆ *Epidemiologists* bring a skills set to food policy from public health. They focus on the nature, causation and prevention of diseases, bringing a population rather than individual perspective. Epidemiological data on diet's impact on non-communicable diseases such as heart disease and some cancers have been hugely important and also threatening.<sup>19, 20</sup> Food policy in the second half of the 20th century was heavily influenced by the battles between epidemiological analyses – arguing that changes in diet was creating preventable disease patterns – and food supply chain commitments to producing more but cheaper.
- ◆ *Geographers* study how the spatial world is affected by human demands, through products, process and place.<sup>21, 22</sup> Their contribution is to explain the interactions between humans and the spatial environment, mapping how commodities are produced in global networks of supply chains.<sup>23</sup>
- ◆ *Historians*' chronicles of food events have helped sift contemporary rhetoric from events, taking a long view of events. Modern food-quality scandals, for instance, are nothing new.<sup>24</sup> Exposés of adulteration consistently reshaped policy for two centuries.<sup>25, 26</sup>
- ◆ *Home economists* have been tasked with helping populations translate circumstances into feasible diets.<sup>27–30</sup> Their focus is on the domestic aspects of food—cooking, household management, budgeting, and the panoply of quotidian choices which shape what is eaten, by whom and why.<sup>31, 32</sup>
- ◆ *Journalists* have recently produced some powerful critiques of current food systems and captured an important slice of public discourse about its direction and implications.<sup>33–36</sup> The media is immensely important in framing discussion, not least playing to politicians' sensitivities. The role of journalism as both spotlight and commentator on how food is made and delivered is very old. Upton Sinclair's classic *The Jungle*, an exposé of the Chicago meat business in the early 1900s led to a Presidential inquiry and the framing of the US Food and Drug Acts.<sup>37</sup> Frederick Accum's 1820 *Treatise on Adulteration* tried to do the same in the UK but failed.<sup>38</sup> Journalists' role has been to speak directly to the public, guardians of the tradition of *caveat emptor* - buyer beware!

Nema jedinstvene definicije o konceptu urbane poljoprivrede upravo zbog toga što i tumačenje pojma hrana može biti posmatrano sa više različitih stajališta kako je i prikazano u ovom tekstu.

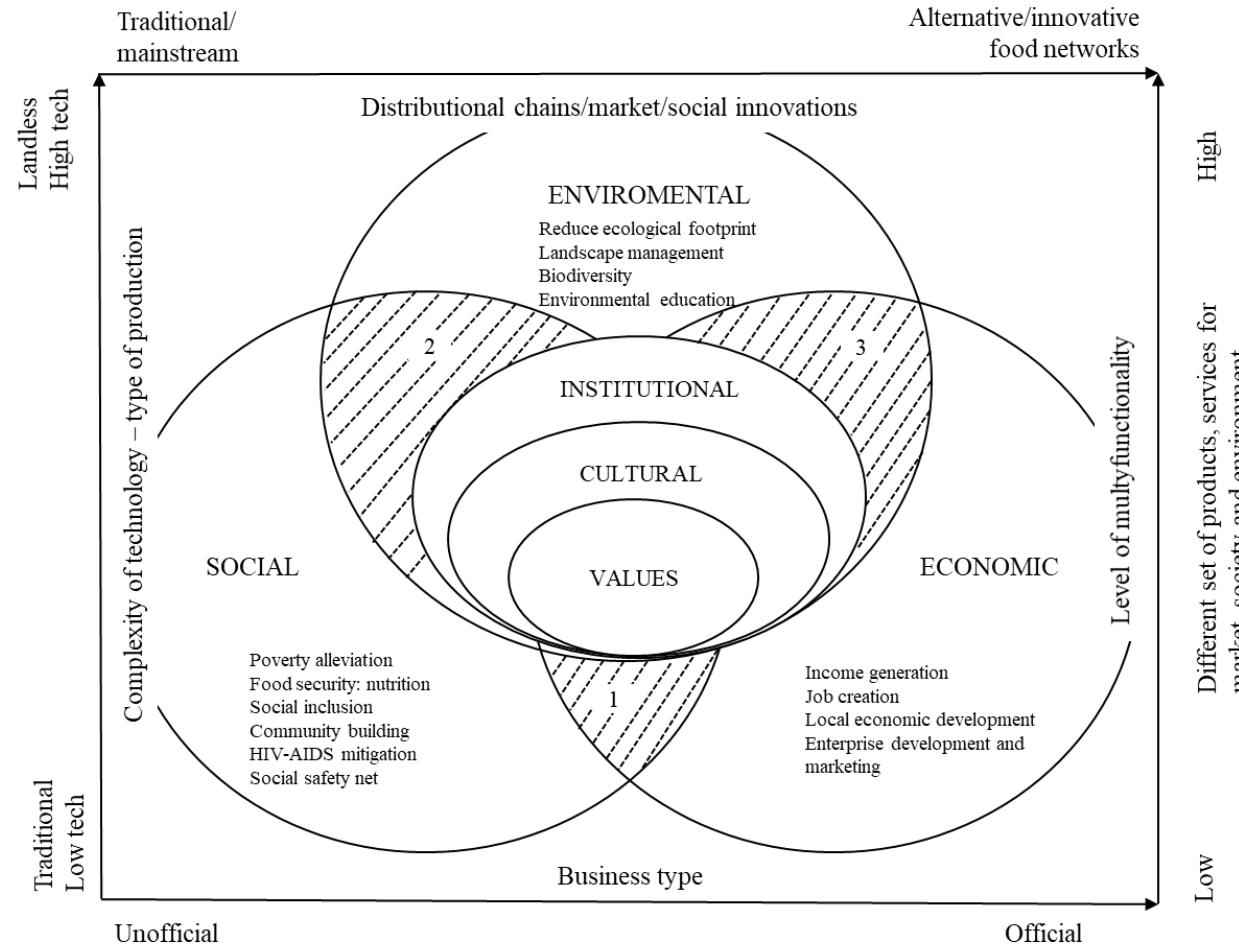

# URBANA POLJOPRIVREDA - DEFNICIJE

Urbana poljoprivreda je pokret koji je nastao kao odgovor na ranije navedene probleme, nastao kao pokret građana sa nastojanjem da se odgovori raznolikim problemima koji se javljaju u urbanim sredinama.

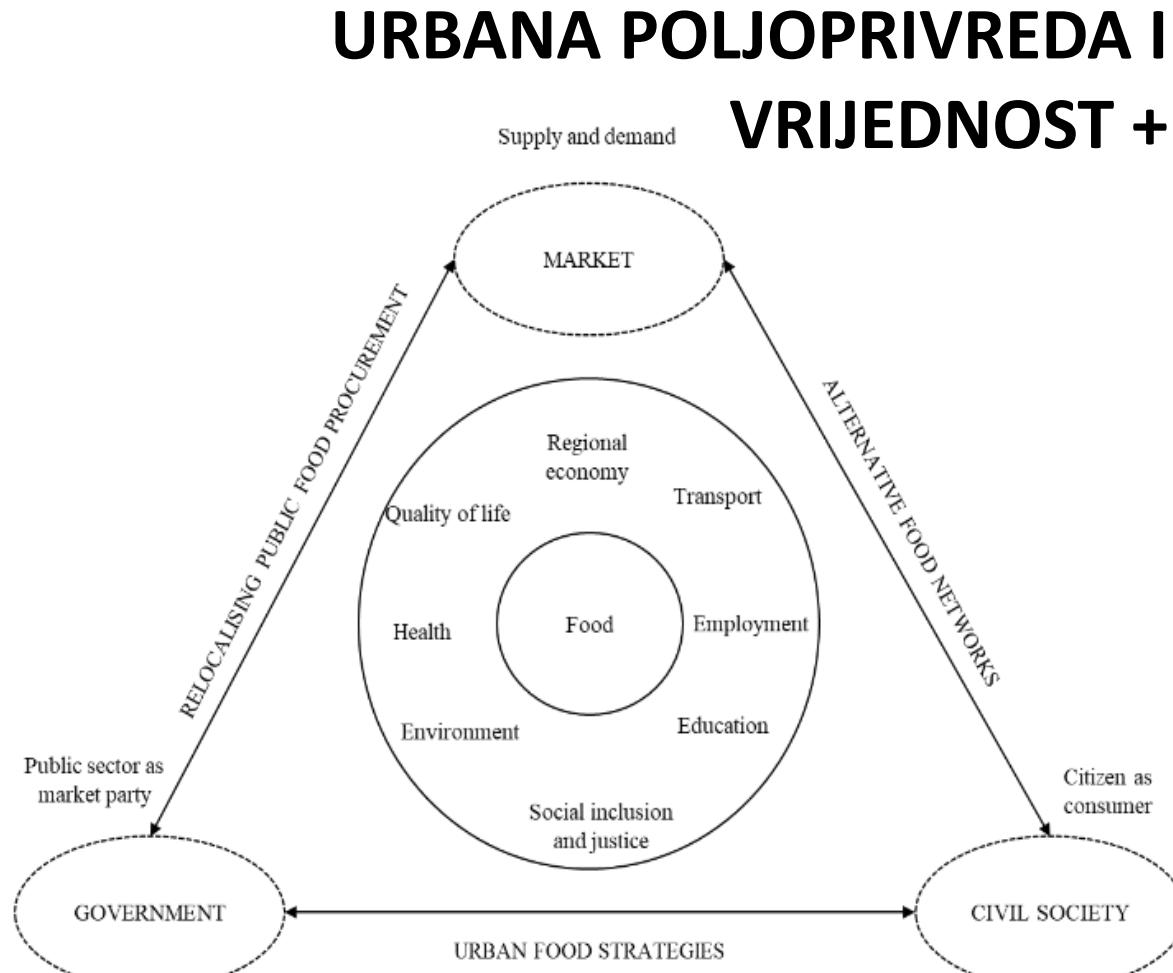

Zajednički elementi u svim definicijama su (Nikolić & Mujčinović, u tisku): blizina urbanih tržišta, zajedničke aktivnosti, efikasno upravljanje javnim dobrima, multifunkcionalnost, inovativni i alternativni pristupi hrani/proizvodnji/distribuciji/potrošnji, a sve ovo izgrađeno na dodatnim vrijednostima.

- ♦ Philosophers have the oldest disciplinary pedigree, two thousand years or more of viewing food as location for moral dilemmas and daily philosophical choices.<sup>49, 50</sup> Contemporary issues range from children's rights in food behaviour change, the morality of meat-eating<sup>51, 52</sup> and the application of biotechnology<sup>53, 54</sup> to nutrigenomics.<sup>55</sup>
- ♦ Psychologists, since Sigmund Freud and William James began unravelling cognition and learning, have both studied and been paid to help alter consumption and choice.<sup>56, 57</sup> Edward L. Bernays, Freud's nephew, helped shift US marketing from being based on a model of rational behaviour to one that tapped unconscious meanings.<sup>58</sup>
- ♦ Public health specialists used to have to be medical doctors but may have wider disciplinary origins. They do, however, have to have a formal training in public health. Their role in many countries is as guardians of the protection of public health, ie the prevention of disease and the promotion of health. Historically, food has been a big concern and they have taken a leading role – particularly at the local level – in limiting low food standards and in highlighting how poor diet lowered life expectancy.<sup>59</sup> They have championed public health considerations in market-dominated economies' approach to, for instance, the obesity epidemic.<sup>60, 61</sup>
- ♦ Sociologists have a long tradition of studying rural life and the class relations of the countryside;<sup>62</sup> and also of their transition to urban living.<sup>63</sup> Today, social determinants studied range from gender to social class, to age.<sup>64, 65</sup> They have helped develop cultural analysis of consumption,<sup>66–68</sup> health and healthcare,<sup>69</sup> gender and body attitudes,<sup>70</sup> and trust relationships.<sup>71</sup>

- ♦ Nutritionists came of age in the mid-19<sup>th</sup> century and refined understanding of the role of particular nutrients—proteins, vitamins, macro-/micronutrients and so on.<sup>39, 40</sup> Transferring this science into policy has not always been seamless, with battles over whether diet is being distorted by production.<sup>41, 42</sup> Modern nutrition ranges from exploring diet and genetic pre-programming<sup>43, 44</sup> to concerns about social inequalities in consumption.<sup>45</sup>
- ♦ Political scientists explore how institutions and political processes shape policy outcomes and they explain the ideas and concepts that inform these processes, such as authority, legitimacy, accountability and democracy.<sup>4</sup> Questions about decision-making on food policy have

**Legend:**  
 1 – Economic-social: business ethics, fair trade, human rights, labour rights;  
 2 – Social-environmental: environmental justice, natural resources, stewardship locally and globally;  
 3 – Environmental-economic: energy efficiency, incentives for use of natural resources.  
**Sema 20** - Complexity of the urban agriculture concept (authors' conceptualization based on Dubbeling and de Zeeuw, 2007; Tavanti, 2010)

**Šema 21. Integrated food geography (Wiskerke, 2009)**

Mnogobrojne interakcije unutar sistema omogućavaju široku paletu aktivnosti/poslovnih modela urbane poljoprivrede.

# URBANA POLJOPRIVREDA I

## VRIJEDNOST +

**Tabela 5.** Koristi od primjene urbane poljoprivrede (Nikolić & Mujčinović, u tisku)

## **MICROGARDENS PROGRAMME, DAKAR, SENEGAL**

Aims to improve food access and economic opportunities in the context of high levels of poverty and food insecurity, while ensuring environmentally friendly use of waste materials where there is a lack of space for food growing. Supported by city government and funded by FAO, the City of Milan and the Italian Ministry of Foreign Affairs, it involves providing growing space access and training in soil-less systems using cheap, locally-available substrates. It has provided 4,000 families with income and healthy food and participants' families eat more vegetables. (Sources: Forster et al., 2015; Ba & Ba, 2007; Baudoin, 2010).

## **FOOD WASTE AND YARD WASTE PLAN, HONG KONG**

Aims to reduce landfill food waste, as Hong Kong's landfill sites are nearly full and there is concern over rotting food contaminating groundwater and emitting gases that affect air quality. It also boosts emergency food provisioning through re-use and donation. The main driver is the Hong Kong Government's Environment Bureau. The steering committee is made up of local government and food chain actors. The campaign includes a business charter, a restaurant accreditation scheme and training of community 'ambassadors'. (Sources: Environment Bureau, 2014; Food Wise Hong Kong, 2013; Environmental Protection Department, 2016).

## **PUBLIC POLICY ON FOOD SECURITY, FOOD SOVEREIGNTY AND NUTRITION, MEDELLIN, COLOMBIA**

Aims to provide an adequate, balanced, healthy diet for all, in the context of high food insecurity where half the population is under- or overweight. Also supports sustainable agriculture, fair trade, gender equality and population growth due to migration. Managed by the Food Security Unit in the Medellin government, it involves food provision and educational programmes. The Committee is chaired by the Mayor and involves actors from city departments, NGOs, academia, business and the health sector. It is monitored by the University of Antioquia. (Source: FAO, 2016).

## **POLICY FOR SUSTAINABLE DEVELOPMENT AND FOOD, MALMÖ, SWEDEN**

Aims to reduce climate change contribution of food in public canteens, in the context of Sweden's food system being responsible for 25% of GHG from private consumption. It also brings economic benefits through sourcing food locally where possible, and public health benefits. The policy originated with civil servants and a politician, and is run by City environment department in cooperation with other city departments. The main activities are reducing meat served in public canteens and working towards the aims of 100% of public food procurement being organic by 2020. By the end of 2015, 55% of food in public canteens was organic; so far there has been a small reduction in GHG emissions. (Sources: Moragues-Faus & Morgan, 2015; The City of Malmö, 2010; Andersson & Nillson, 2012).

IZGRADNJA VRIJEDNOSTI +

Figure 17

## Transition of the market towards more sustainably produced products

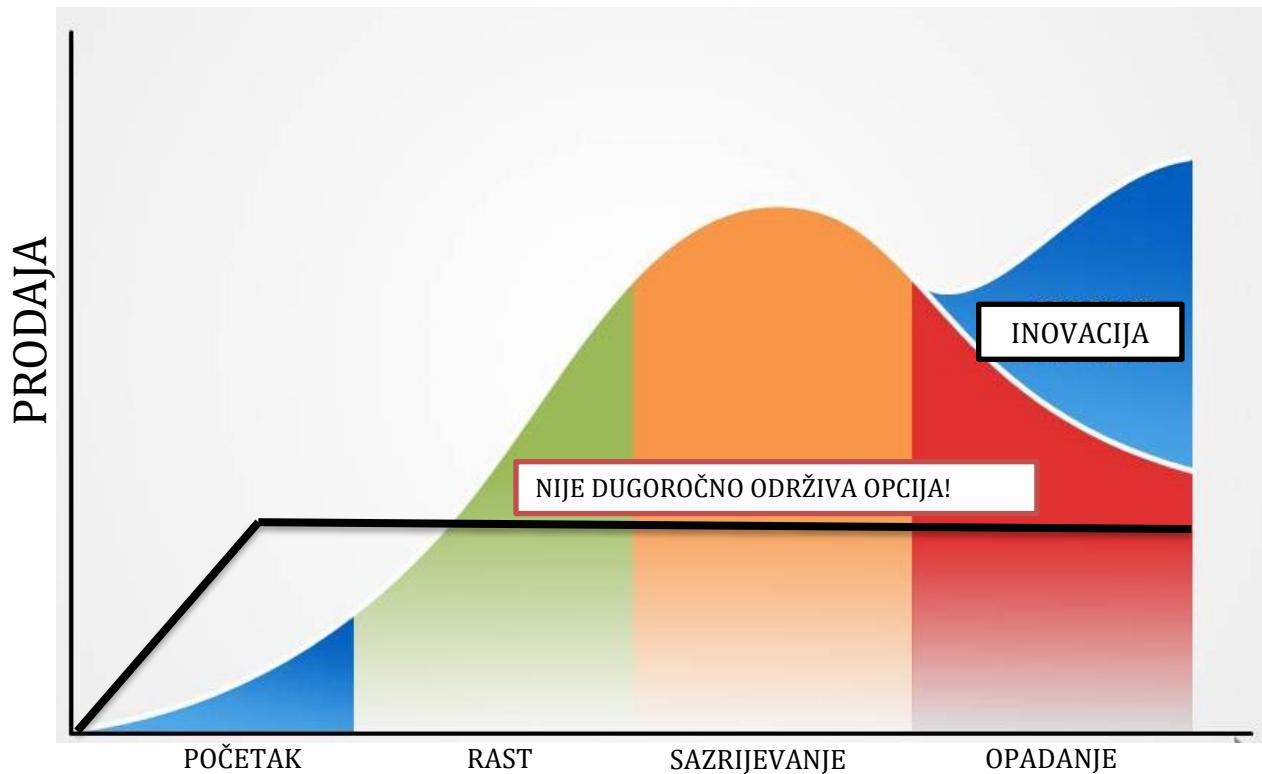

Source: PBL, 2013

Different types of businesses are active in the different phases of the transition process towards the use of sustainably produced raw materials. The government can provide the different businesses incentives and mobilise them towards further sustainability. Every type of business requires a different strategy and role in order to accomplish that.

## TRANZICIJSKI PERIOD – faze rasta i razvoja

# TRANZICIJSKI PERIOD – faze rasta i razvoja

Grafikon 5. Faze razvoja biznisa

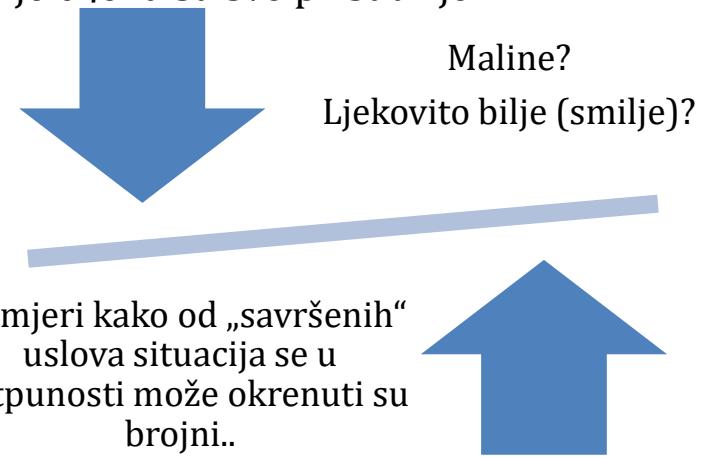

Nužno je konstantno napredovati, 21 stoljeće osim što nudi mnoštvo prilika, okarakterisano je sa nemilosrdnom konkurencijom, rapidnim promjenama, brojnim drugim faktorima koji mogu ugroziti poslovanje.

Napredovanje može biti usmjeren na poslovne i na proizvodne procese.

Razlozi zbog kojih morate konstantno raditi, unapređivati:

- vrijeme (godine) prolazi;
- resursi su utrošeni;
- klima se mijenja konstantno;
- vremenski uslovi su izražajniji;
- fluktuacije cijena su sve prisutnije

# TRANZICIJSKI PERIOD – faze rasta i razvoja

Grafikon 6. Vrijednost tržišta organskih proizvoda u svijetu (Willer i Lernoud, 2019)

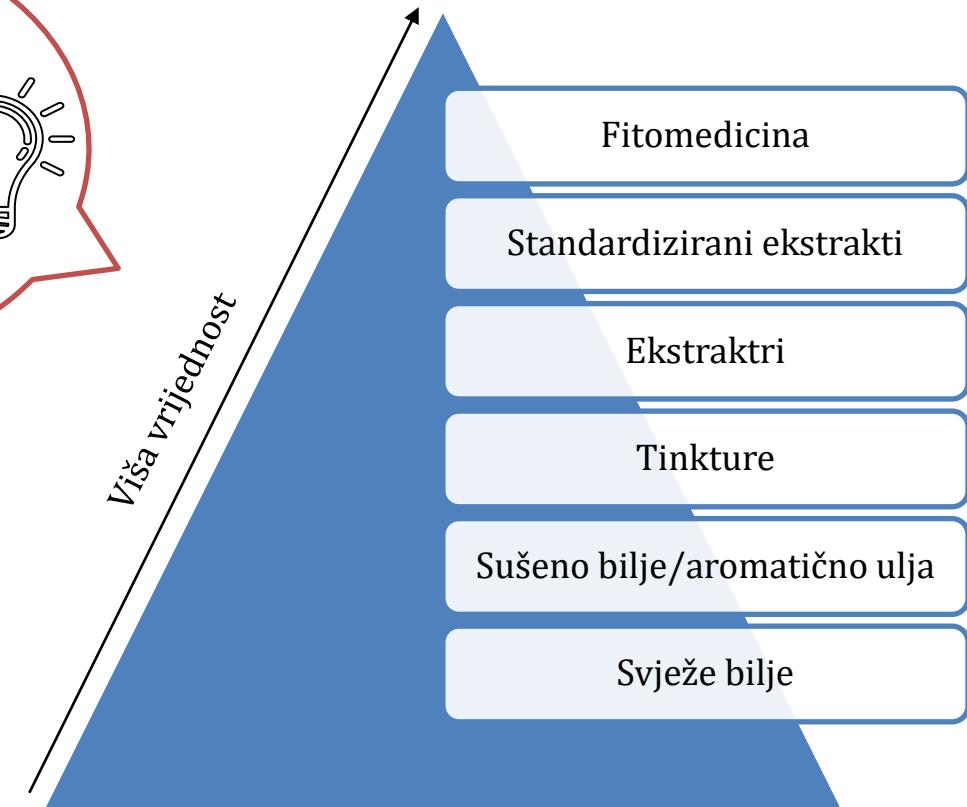

# VRIJEDNOST +

Nije dovoljno samo proizvesti proizvod.  
Čitav set dodatnih vrijednosti moraju biti naglašene.  
Prateće usluge trebaju biti uključene u finalni proizvod.

ŠTA UČINITI DA  
SE OVO  
PROMJENI?  
(INDIVIDUALNO  
SVAKI  
PROIZVOĐAČ)

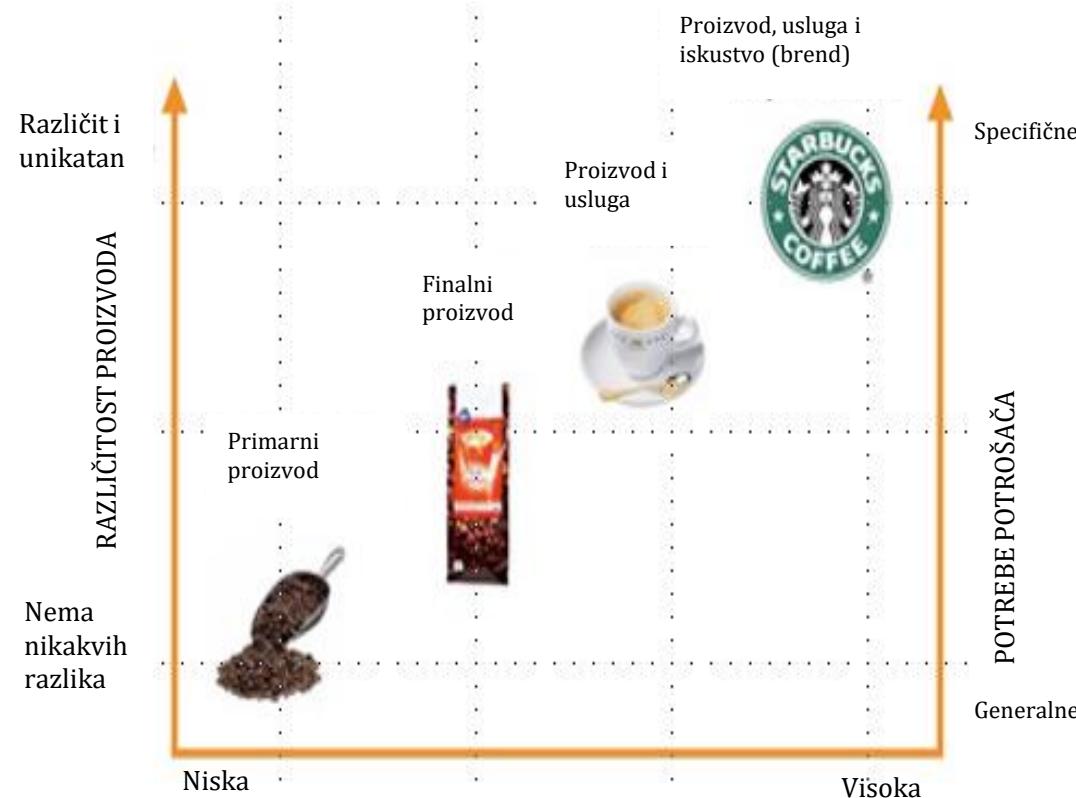

**Šema 22.** Nivoi dodatne vrijednosti proizvoda u sektoru ljekovitog i začinskog bilja

Primjer u sektoru ljekovitog i začinskog bilja – fokus samo na svježem/sušenom bilju, ulju, šta je sa ostalim proizvodima?

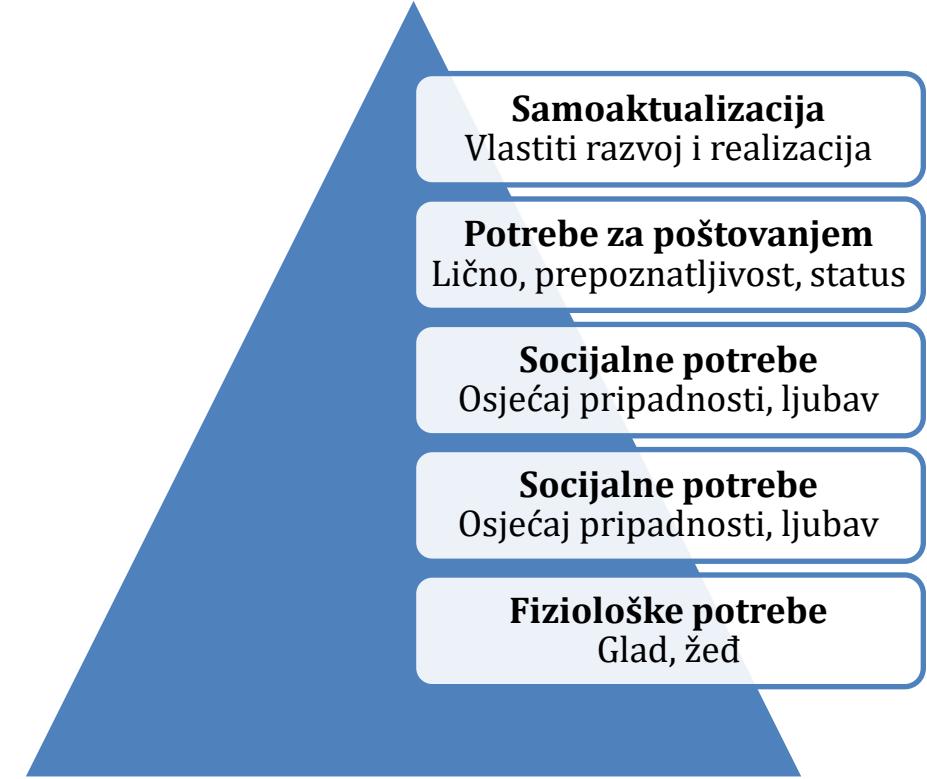

# VRIJEDNOST +

Šema 23. Kako generisati višu cijenu na tržištu

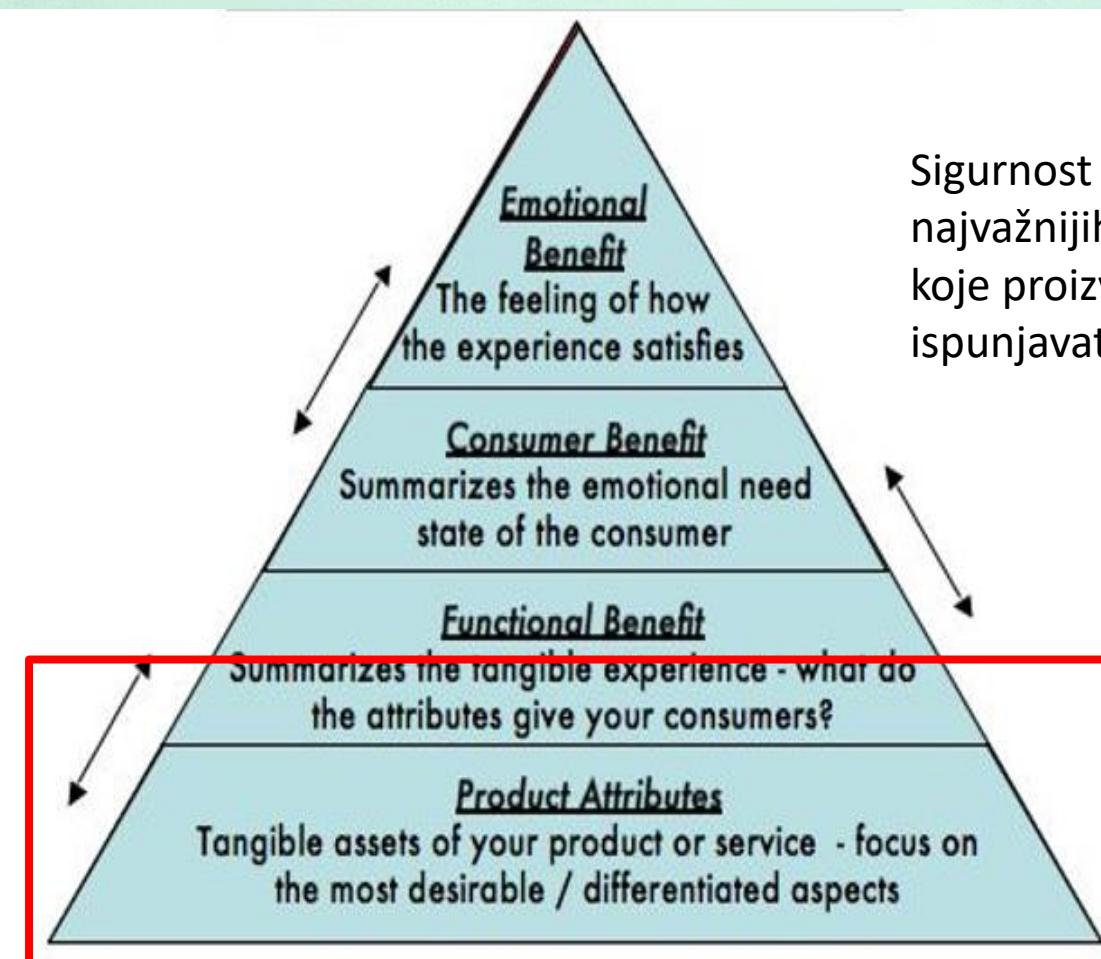

Nužno je pronaći tržišnu nišu kako bi se ostvarila viša tržišna vrijednost, ali da bi se to postiglo neophodno je kreirati proizvod koji je različit, unikatan, te zadovoljava više specifičnih potreba potrošača/kupaca.

Šema 24. Maslovlijeva hijerarhija potreba (Armstromg i Kotler, 2007)

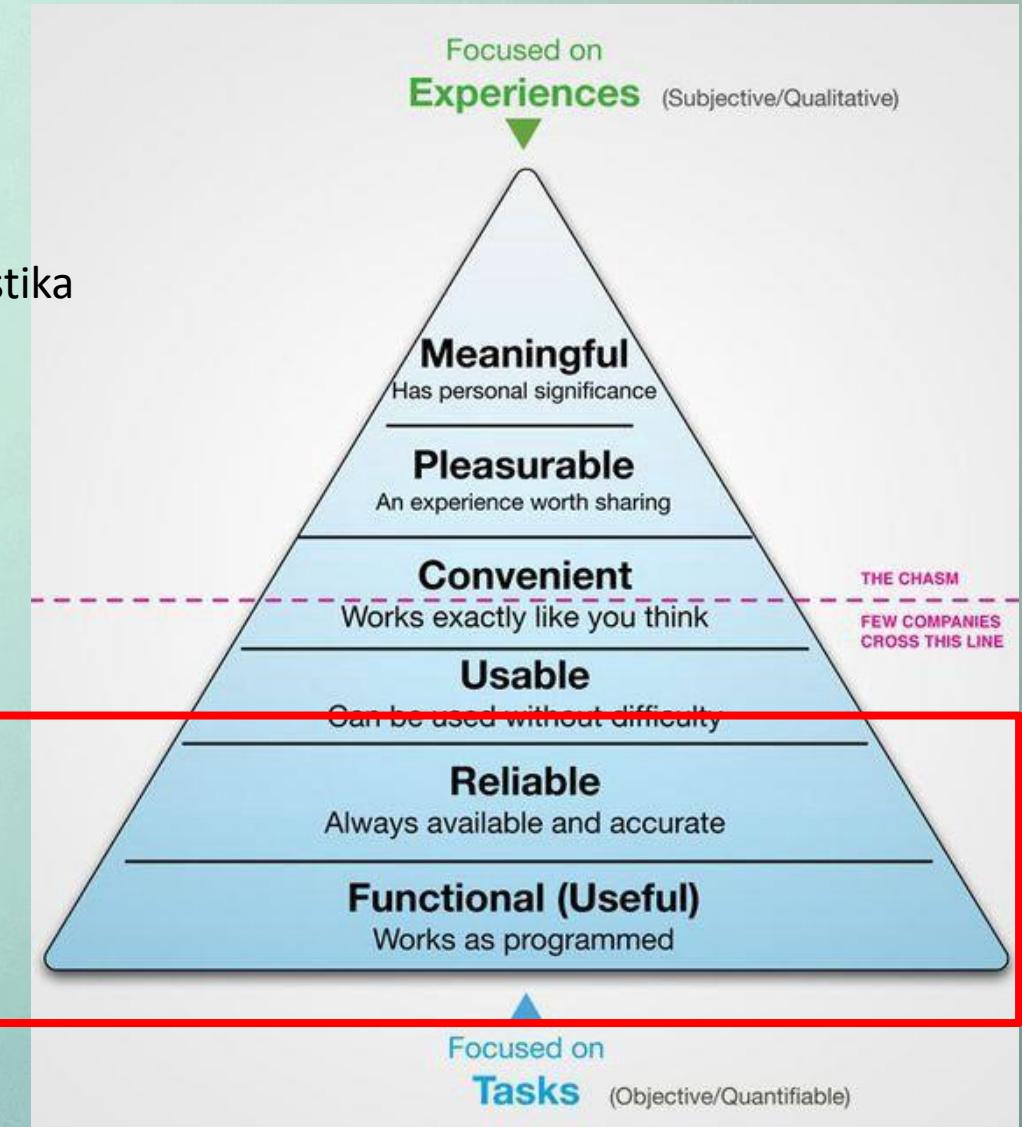

Iako je Maslovlijeva piramida prvo korštena u psihologiji, kasnije je njena primjena proširena na sve aspekte života, tako i na poslovanje kompanija i identifikaciju potreba, bolje prilagođavanje proizvoda, te lakši plasman proizvoda i generisanje viših prihoda.

# VRIJEDNOST +

Sigurnost jedna od najvažnijih karakteristika koje proizvod mora ispunjavati.

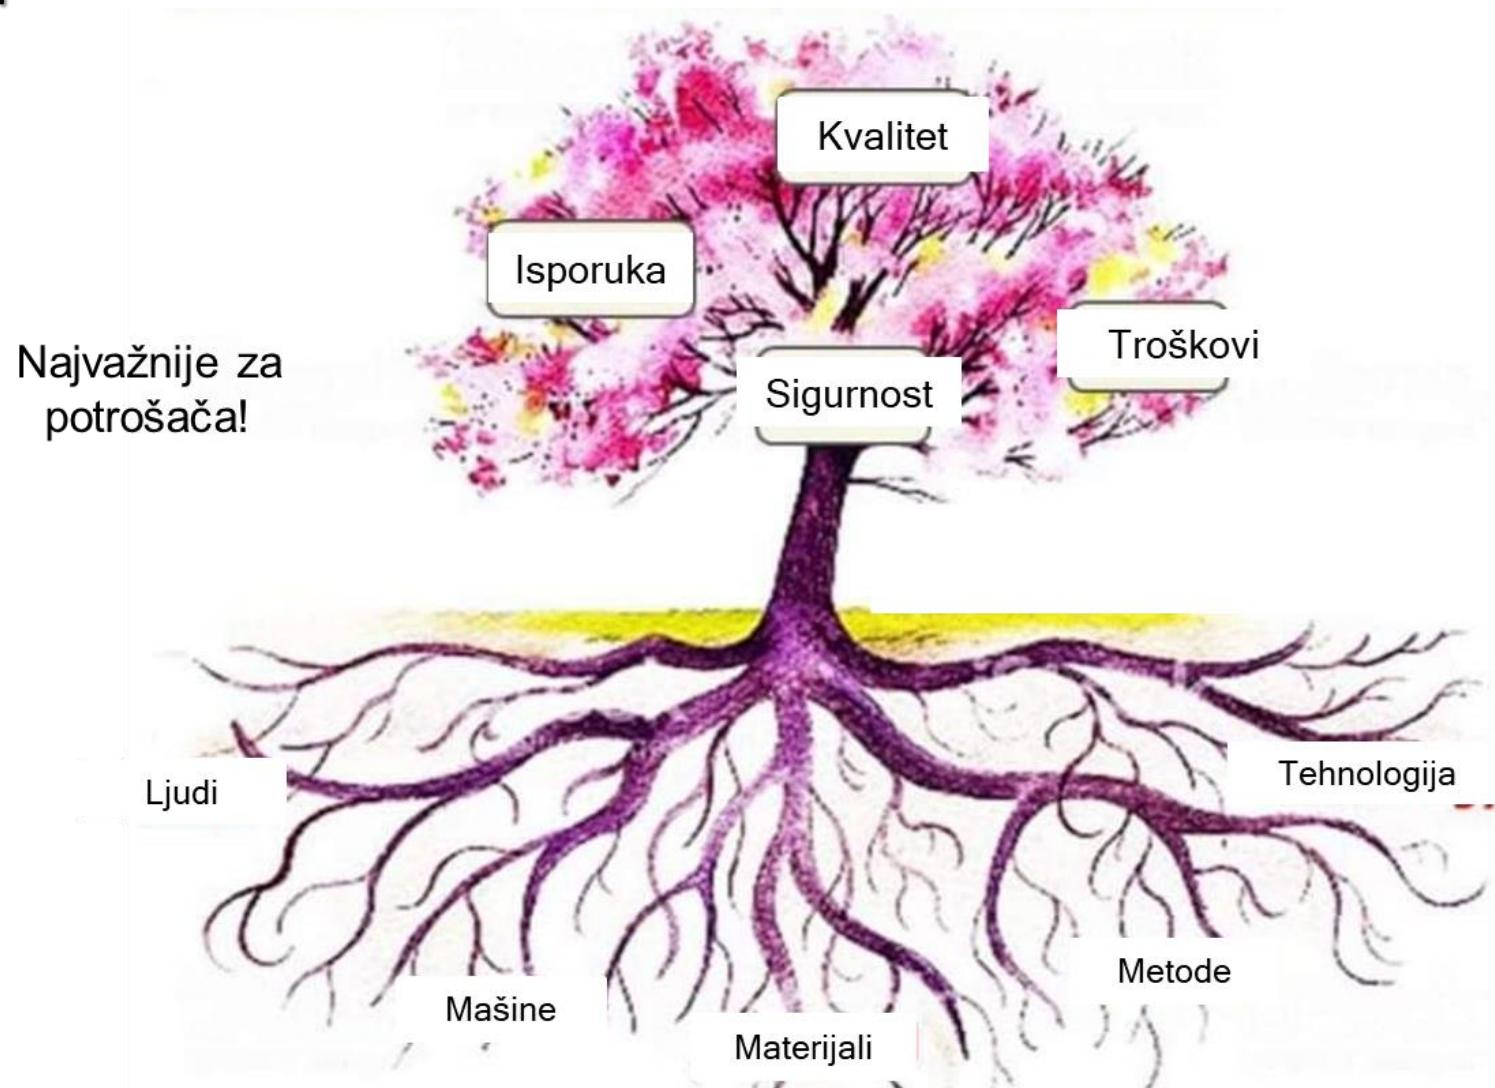

# URBANA POLJOPRIVREDA I SIGURNOST

**USLUGE  
VRIJEDNOSTI**

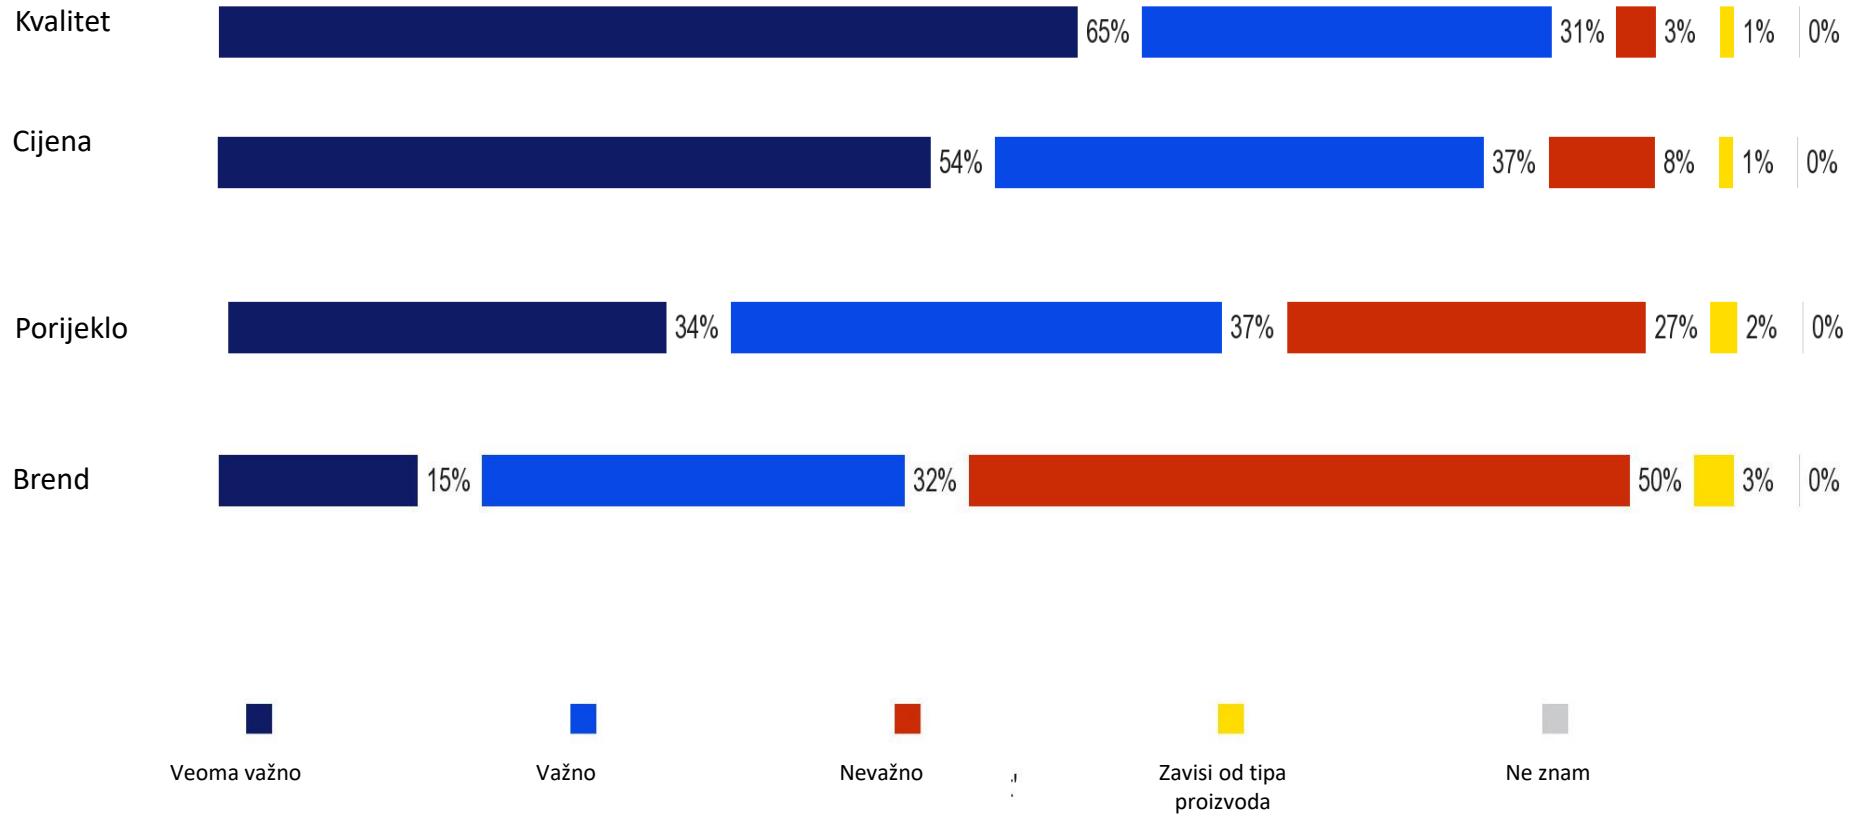

# URBANA POLJOPRIVREDA I SIGURNOST

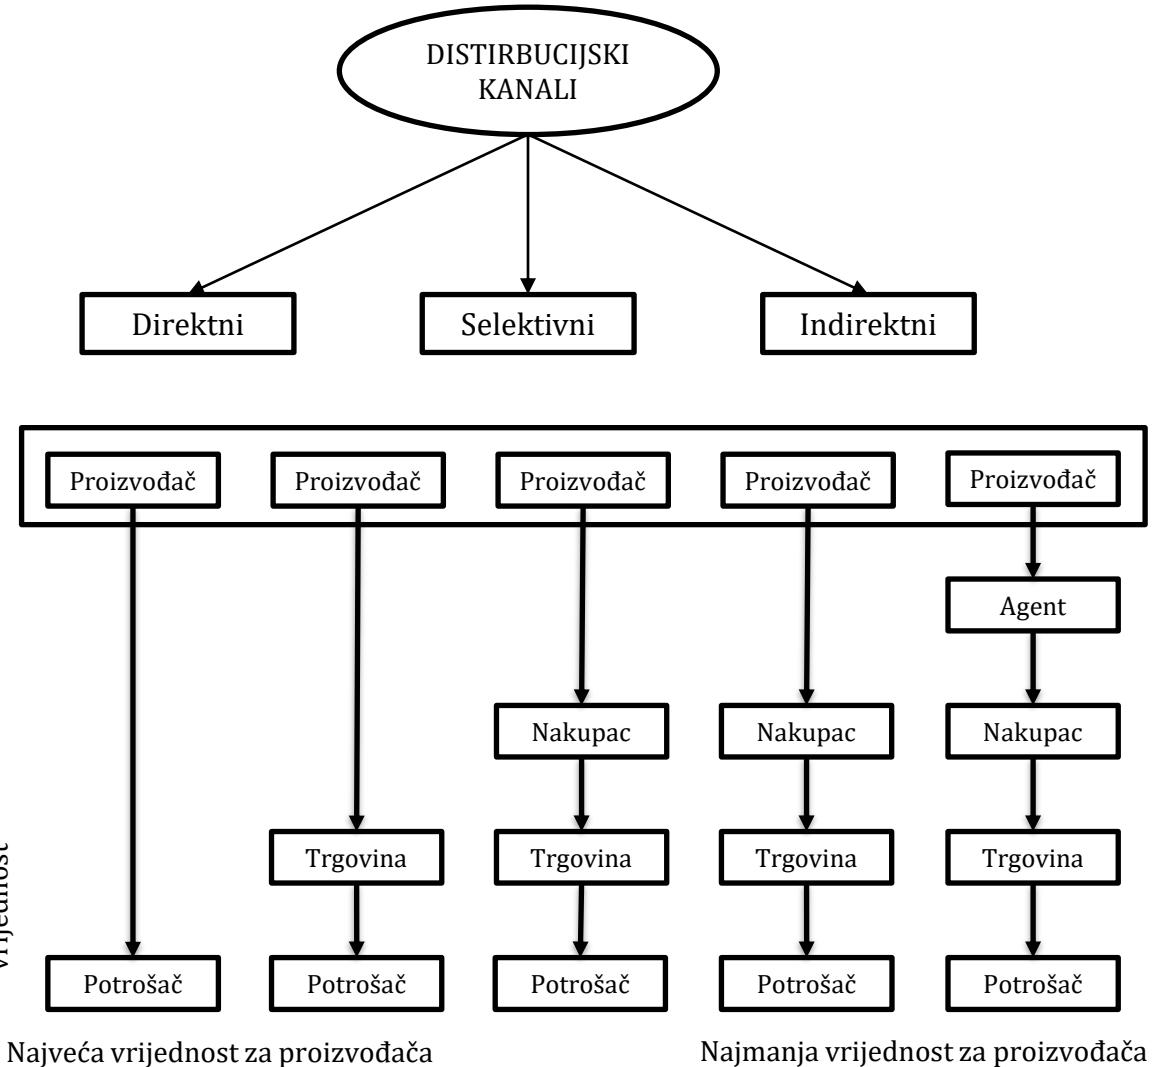

Najvažnije za  
proizvođača!

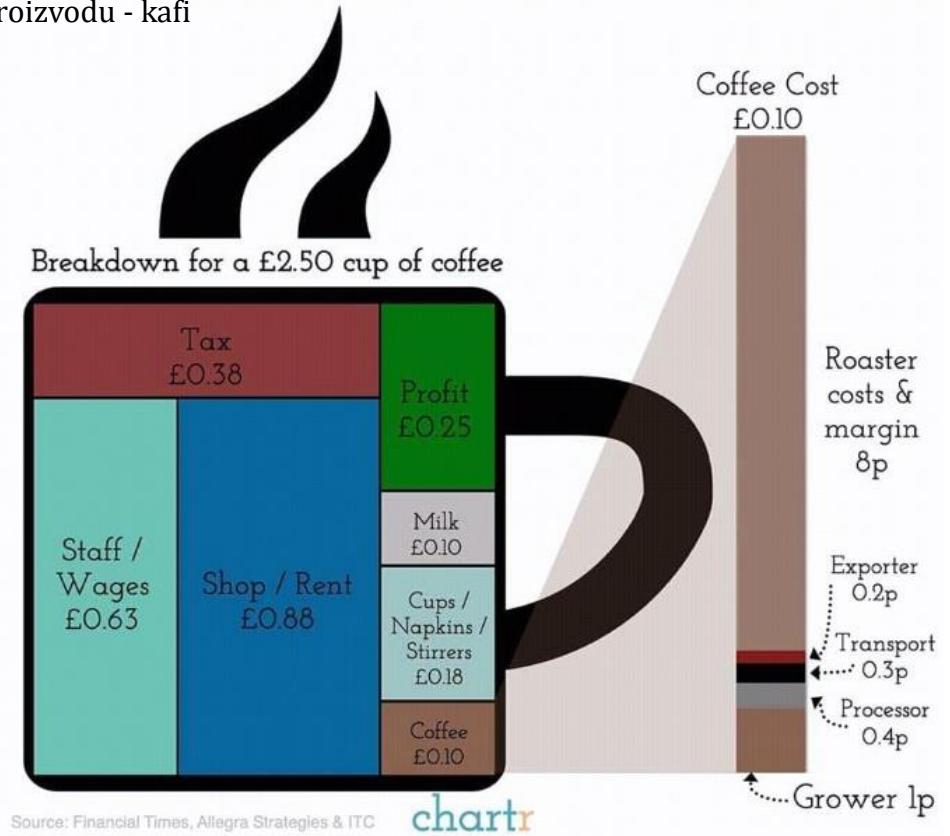

# ZA ZAPAMTITI – NAJVAŽNIJI FAKTORI PRI KUPOVINI PREHRAMBENIH PROIZVODA U EU

# VRIJEDNOST +

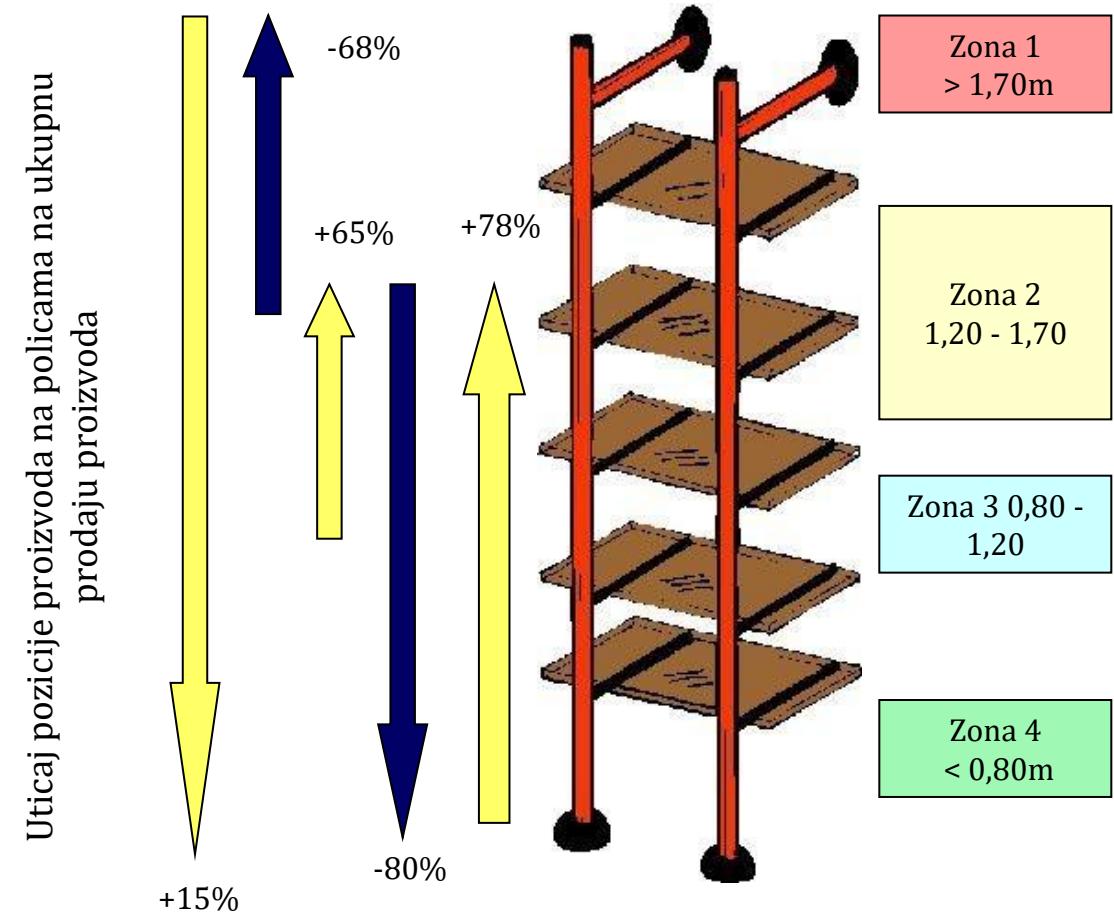

**Šema 27.** Udjeli zarade različitih sektora u finalnom proizvodu - kafi

Najmanji dio zarade od finalnog proizvoda ide proizvođačima!  
U slučaju kafe, samo 4% ukupne vrijednosti kafe ide proizvođačima.  
Slična situacija je i sa ostalim proizvodima.

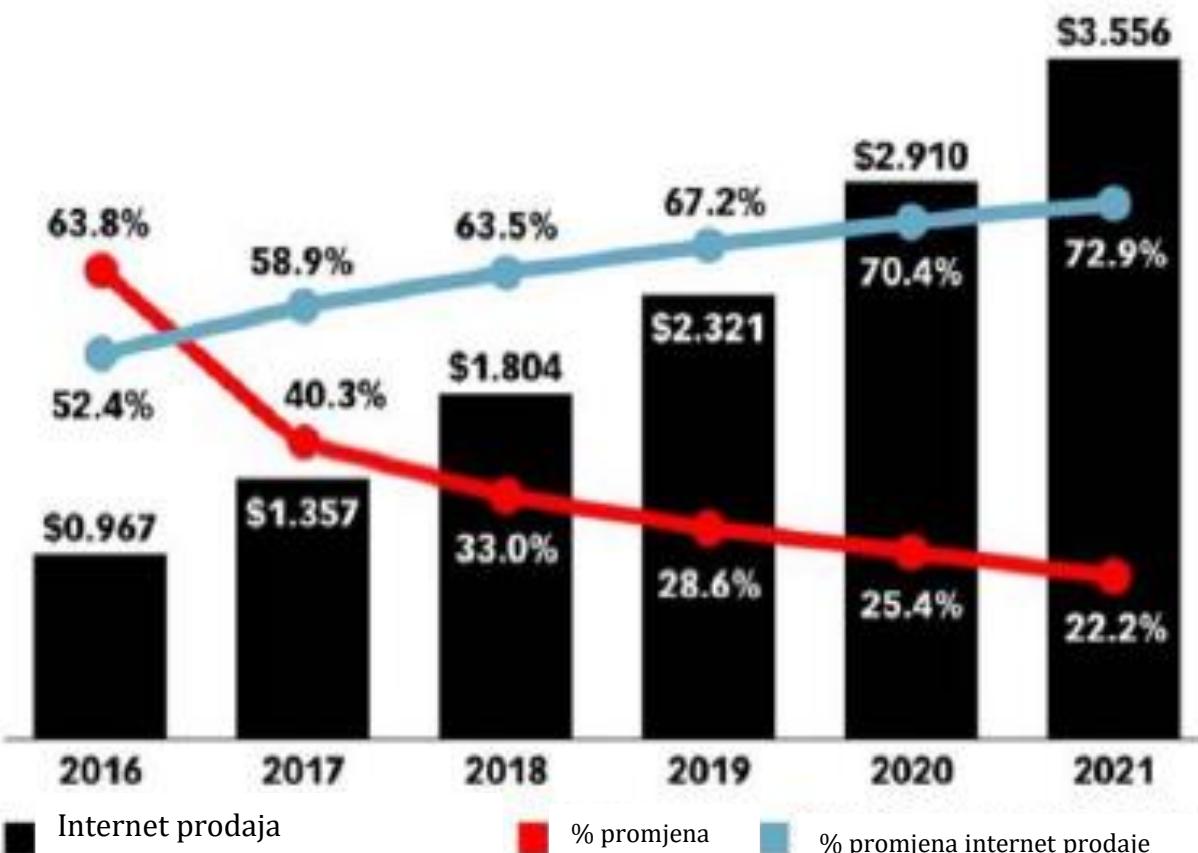

# VRIJEDNOST +

- Veoma je važno odabrati prave kanale distribucije, svaka pogreška koštati će vas finansijski, tako da je najbolje detaljno analizirati, testirati određeni distribucioni kanal prije nego se definitivno odlučite.
- Krenite sa manjim količinama pa ispitajte odgovor potrošača/kupaca.
- Povedite računa da pozicija vašeg proizvoda (ukoliko se radi o marketima, supermarketima, trgovinama generalno) uveliko utiče na prodaju proizvoda (to se najbolje primjeti sa slike desno).
- Isplanirajte šta vam je sve neophodno da bi plasirali proizvode, uključujući transport, skladištenje, sortiranje, pakovanje, zalihe i sve ostale elemente koji mogu ugroziti saradnju sa novim distribucionim kanalom (mjestom prodaje).

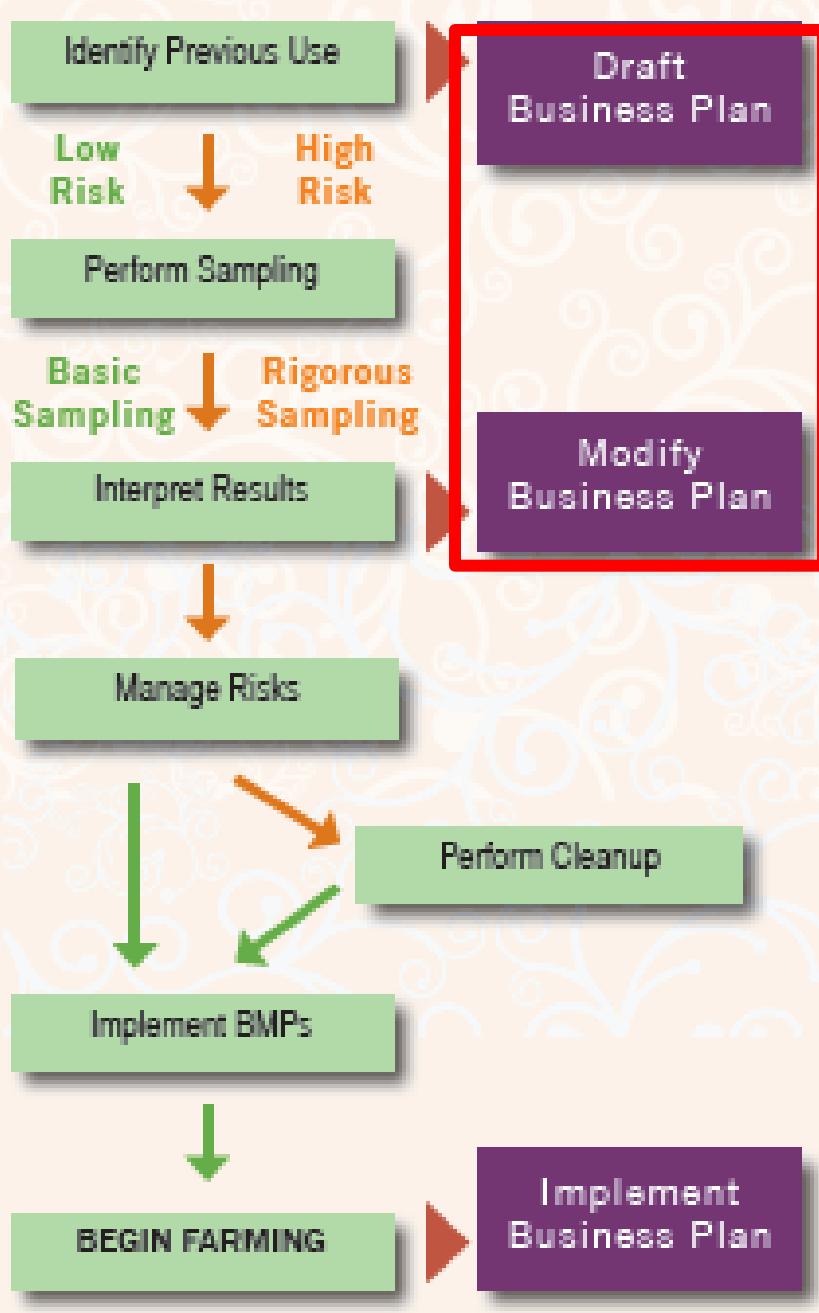

# VRIJEDNOST +

Grafikon 7. Internet maloprodaja u svijetu (2016-2017)

- Htjeli priznati ili ne, svakim danom internet trgovina sve više dobija maha.
- Prehrambeni proizvodi također bilježe snažan rast u internet trgovini, tome u prilog govori i sve veći broj stranica koje nude mogućnost narudžbi.
- Oficijelne stranice za narudžbu imaju puno snažniji efekat od neoficijelnih (poput facebook, instagram, twiter i sl.), pogotovo u prvim fazama kada niste poznati.
- Povjerenje i transparentnost su najvažniji elementi! Vi prodajete hranu, eventualna kontaminacija (uključujući i ostatke piljevine, drveta, kamena, metala i sl.) može biti pogubna za biznis.
- Higijenska, zdravstvena kontaminacija je neprihvatljiva u ovom poslu.

KAKO RAZVITI IDEJU/POČETI SA BAVLJENJEM URBANOM  
POLJOPRIVREDOM?

# KAKO POČETI SA URBANOM POLJOPRIVREDOM?

Postoje brojne forme **BIZNIS PLANova**, vodite računa da finansijer često ima vlastitu formu biznis plana.

# PUT KA KREIRANJU PREPOZNATLJIVOOG BIZNISA

---

Identifikacija mogućih tržišnih segmenata (prepoznati kome možete prodati proizvode;

---

Koji su segmenti najatraktivniji;

---

Segmentacija

Identificirati prednosti/nedostatke segmenata (potrošača);

---

Osmisliti marketing miks (proizvod, cijenu, distribuciju, promociju)

---

Ko su trenutni potrošači, potencijalni potrošači?

Marketing sredstva?

BROJNA PITANJA  
ĆE SE JAVITI

Šta je potrebno od resursa da bi se doprijelo do novih potrošača?

Premium cijene?

# PUT KA KREIRANJU PREPOZNATLJIVOOG BIZNISA

## Strateško planiranje

- Identificirati tržišne prilike
- Identificirati vlastite resurse (finansijske, ljudske), snage i slabosti

## Definirati misiju i viziju

- Definirati cilj, ciljeve koje želite postići, pretočiti to u pisanu formu (skloni smo zaboravljanju)

## Djelovati

- Krenuti sa implementacijom ideje
- Upisati sve resurse koji su potrebni, naročito novčana izdvajanja

## Pratiti ispunjenje ciljeva

- Ovo je naročito važno u prvim godinama poslovanja, kada još nije razvijena rutina praćenja ostvarenja

## Organizacijske izmjene

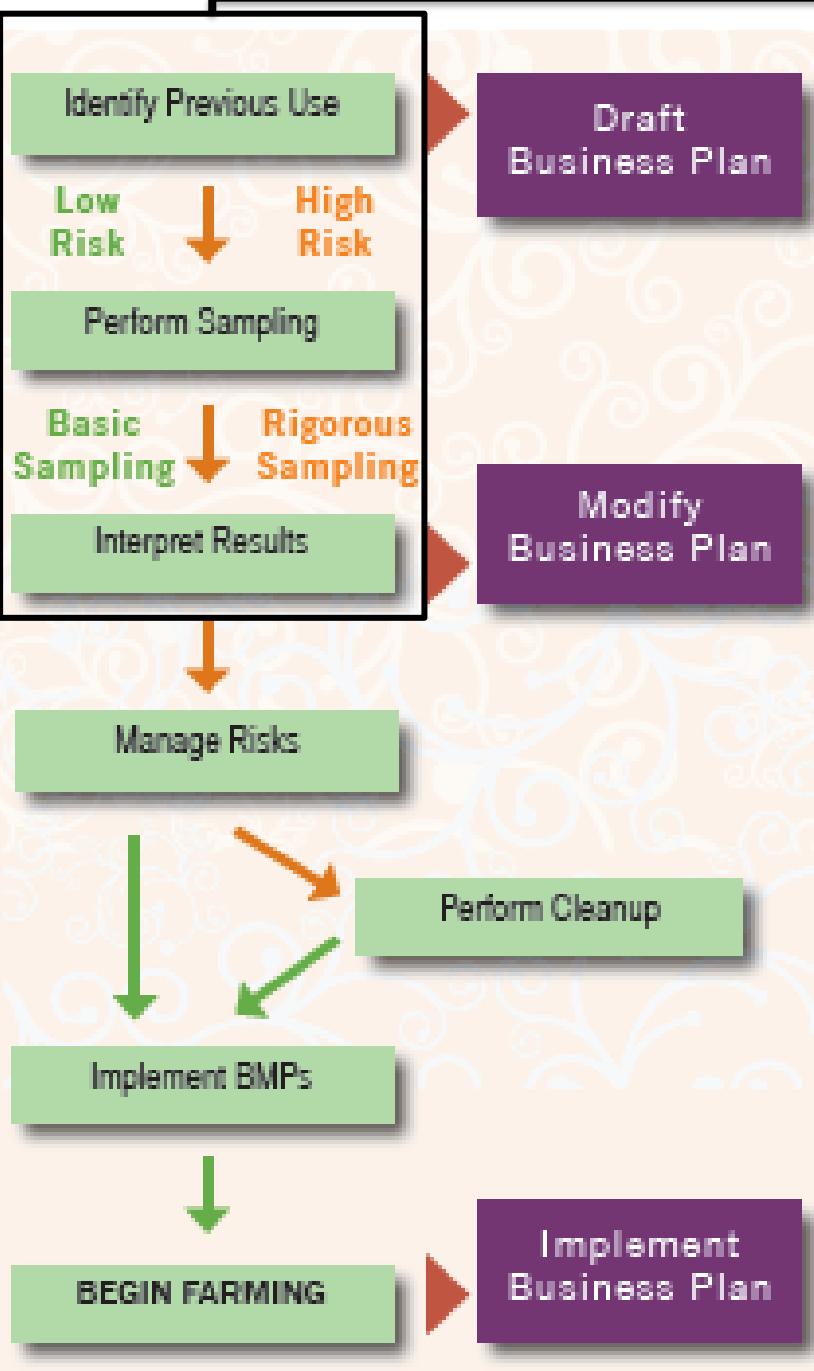

- Ukoliko je potrebno angažovati dodatne radnike, promjeniti zaduženja
- Svi ne mogu raditi sve!

Ne postoji univerzalna formula, svaki biznis, svako gazdinstvo, svaki vlasnik je različit, tako da su elementi koji vode kreiranju prepoznatljivog proizvoda različiti.

Najvažnije je učiti i komunicirati sa drugima, razmjenjivati informacije, tražiti savjete prije nego donesete konačnu odluku.

# PUT KA KREIRANJU PREPOZNATLJIVOOG PROIZVODA – O ČEMU RAZMIŠLJATI

| Novi proizvod  | Menadžment  | Tržište  | SWOT analiza | Marketing strategija   | Marketing mix   | Plan implementacije /realizacije ideje   |
|--|---|--|--------------|--|---|--|
| <ul style="list-style-type: none"><li>• Razvoj ideje;</li><li>• Nutritivni sastav;</li><li>• Konkurentske prednosti;</li><li>• Dalji razvoj;</li></ul> | <ul style="list-style-type: none"><li>• Performanse kompanije, lokacija i objekti/oprema, trenutni proizvodi, sektor i tržište;</li><li>• Upravljački sistemi i resursi;</li><li>• Vizija, misija i ciljevi kompanije;</li><li>• Trenutna marketing strategija</li><li>• Doprinos novog proizvoda</li></ul> | <ul style="list-style-type: none"><li>• Ciljno tržište i segmenti;</li><li>• Procjena mikrookruženja (kupci, konkurenca, zaposlenici, dobavljači, distributeri, distributivni lanci, substitutivni proizvodi) – Pet Porterovih snaga?</li><li>• Procjena makrookruženja (globalno tržište,) – PESTLE?</li><li>• Trendovi</li></ul> |              | <ul style="list-style-type: none"><li>• Glavne performanse konkurenata i nivo konkurentskih prednosti na ciljanom tržištu;</li><li>• Prijetnje i prilike;</li><li>• SWOT matrix;</li></ul> | <ul style="list-style-type: none"><li>• Marketing strategija i ostvarene performanse na tržištu;</li><li>• Strategijski savezi i mreže;</li></ul> | <ul style="list-style-type: none"><li>• Proizvod;</li><li>• Cijena;</li><li>• Lokacija;</li><li>• Promocija;</li></ul> |

| Land Use  | Common Contaminants   |
|---|---|
| Agriculture, green space  | Nitrate, pesticides/herbicides  |
| Car wash, parking lots, road and maintenance depot, vehicle services  | Metals, PAHs, petroleum products, sodium, solvents, surfactants   |
| Dry cleaning  | Solvents  |
| Existing commercial or industrial building structures   | Asbestos, petroleum products, lead paint, PCB caulk, solvents   |
| Junkyards   | Metals, petroleum products, solvents, sulfate   |
| Machine shops and metal works   | Metals, petroleum products, solvents, surfactants   |
| Residential areas, buildings with lead-based paint, where coal, oil, gas or garbage was burned  | Metals, including lead, PAHs, petroleum products creosote   |
| Stormwater drains and retention basins  | Metals, pathogens, pesticides/herbicides, petroleum products, sodium, solvents                              |
| Underground and aboveground storage tanks   | Pesticides/herbicides, petroleum products, solvents   |
| Wood preserving   | Metals, petroleum products, phenols, solvents, sulfate  |
| Chemical manufacture, clandestine dumping, hazardous material storage and transfer, industrial lagoons and pits, railroad tracks and yards, research labs | Fluoride, metals, nitrate, pathogens, petroleum products, phenols, radioactivity, sodium, solvents, sulfate |

(Adapted from Boulding and Ginn, 2004)

Izvor: EPA (2011) BROWNFIELDS AND URBAN AGRICULTURE: Interim Guidelines for Safe Gardening Practices, United States Environmental Protection Agency

Studija Univerziteta u Vašingtonu potvrdila da olovo iz zemljišta ne prelazi na voće i povrće, odnosno nisu identifikovani tragovi olova, osim u korijenu. Korjenasti plodovi su potencijalna opasnost.

## ZEMLJIŠTE

- Potencijalno kontaminacija (azbest, petrolej, goriva, olova, prašina, itd.).
- Ostaci olova od primjene pesticida na bazi arsena i sl.
- Blizina puteva – ispušni gasovi (PAH – policiklički aromatski ugljikovodici).
- Ostaci pesticida u javnim parkovima (herbicida naročito).
- Opasnost da djeca se kontaminiraju (običaj da trpaju sve u usta);

## OPREMA

- Držati opremu čistu i često je prati i dezifincirati.

## ZDRAVLJE

- Slučajno gutanje ili inhaliranje npr. zaštitnih sredstava ili para iz zemljišta koje je kontaminirano, i sl.

## POSJETIOCI

- Ovdje se ubrajaju i životinje ali i ljudi koji svojim prisustvom mogu kontaminirati proizvodnju

## RJEŠENJE

- Testirati na oстатке (ili prihvatići da je tlo kontaminirano i) započeti proces remedijacije tala.
- Postavljanje barijera koje ne dozvoljavaju dodir sa tlom – kontaminaciju.
- Korištenje komposta koje umanjuje efekte olova ili ga pretvara u nerastvorljivu materiju.
- Dugoročno baštovanje umanjuje efekte kontaminacije i čini zemljište „spremnjim“ za uzgoj voća i povrća.

## SAMO NEKA OD PITANJA KOJA MOŽETE POSTAVITI:

Da li su proizvodi uzgojeni direktno iz zemljišta ili ne?

Da li je testirano na teške metale?

Da li štitite proizvode od štetočina i napasnika?

Koliko često čistite opremu, proizvode i sl.?

Imate li sigurnosni plan za proizvodnju?

Da li su zaposleni prošli trening o dobim proizvođačkim praksama i sl.?

## URBANA POLJOPRIVREDA I SIGURNOST

Odgovarajući legislativni okvir

Inicijative za osnaživanje privatnog sektora u isporuci sigurne hrane

Promocija dobrih proizvođačkih i prerađivačkih praksi

Dobro kreiran i implementiran sistem upravljanja koji osigurava da hrana bude sigurna

Izgradnja povjerenja kod kupaca

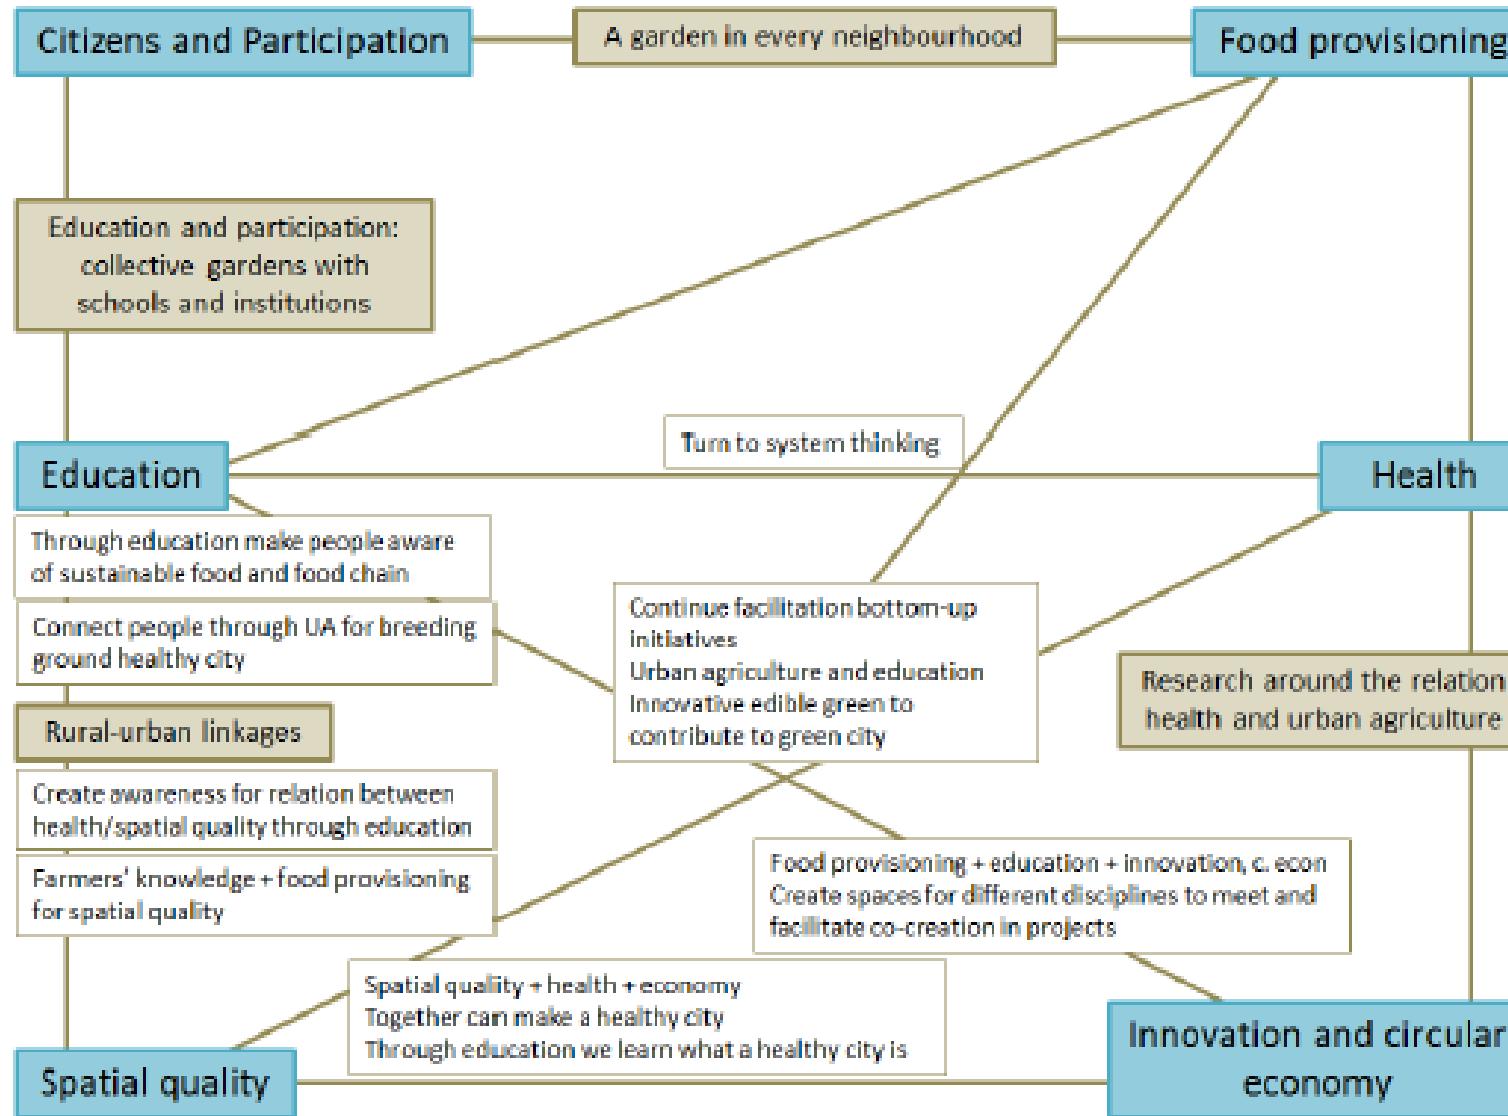

Mreža pouzdanih inspektora (hrane)

Koordinirane aktivnosti nauke i prakse – planovi upravljanja rizicima

Laboratorije pouzdane

Upgrading – sistema hrane (i sigurnosti hrane)

# NA ŠTA OBRATITI PAŽNJU – MEĐUZAVISNOST - INTERAKCIJE

Hebinck, A.; G. Villarreal, H. Oostindie; P. Hebinck; T.A. Zwart; J. Vervoort; L. Rutting and A. de Vrieze (2016) *Urban Agriculture policy-making: Proeftuin040 – TRANSMANGO scenario workshop report, the Netherlands.*

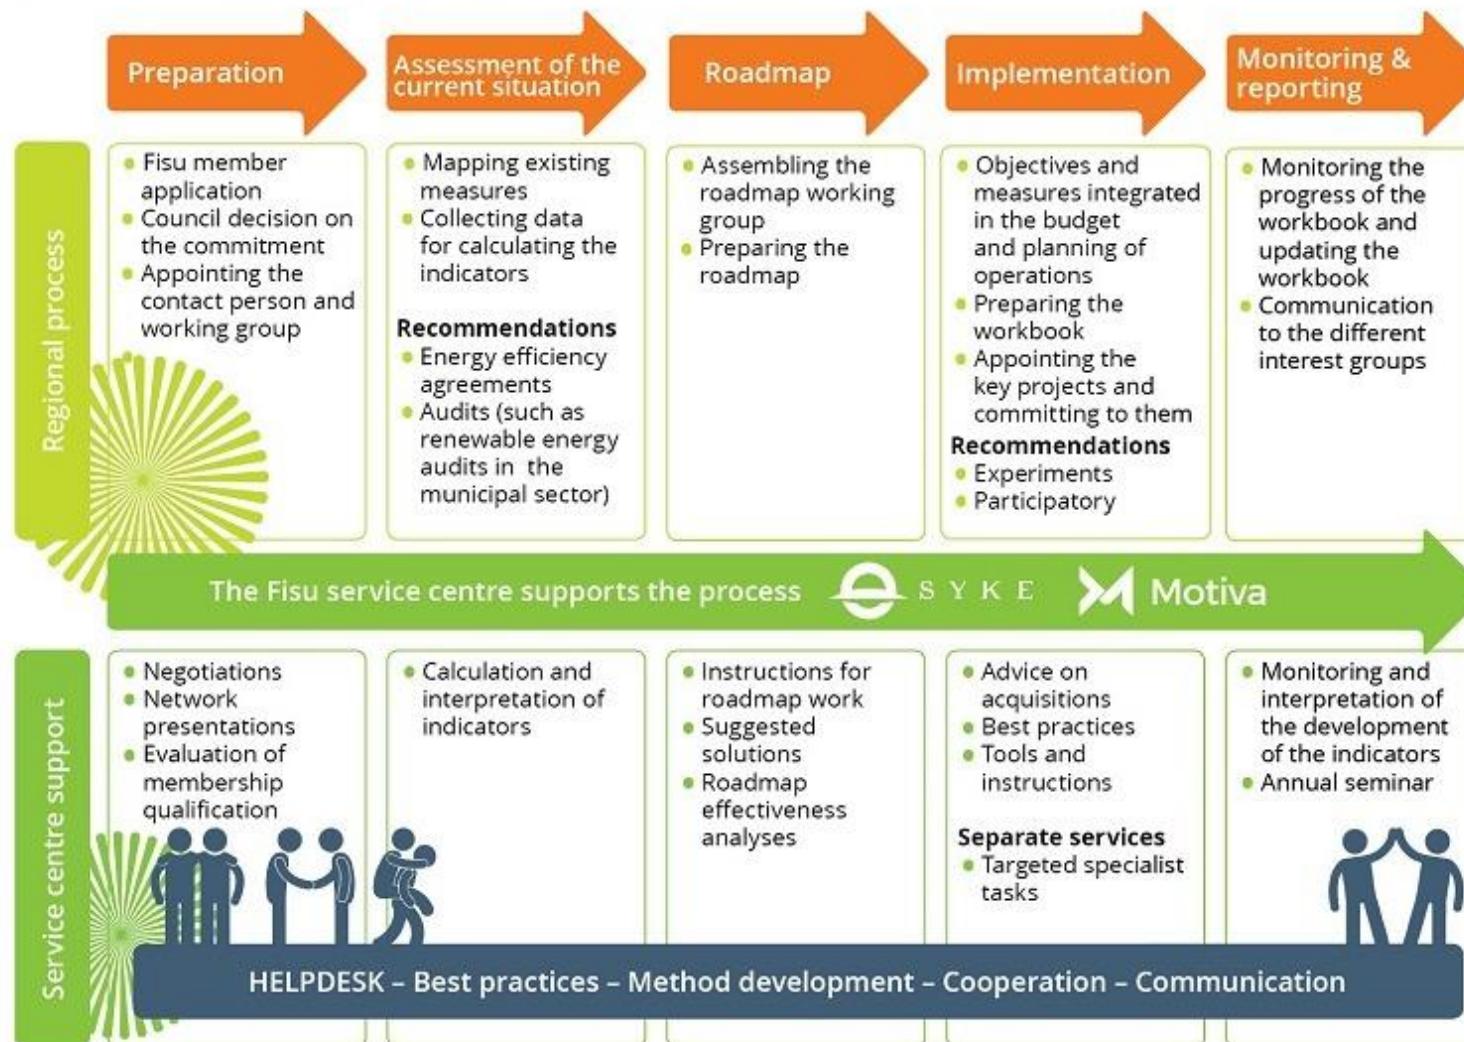

FIGURE 1 FIGURE SHOWING DIFFERENT THEMES, HOW THEY RELATE AND SOME CONCRETE IDEAS THAT CAN FEED INTO THE UA POLICY

## About Fisu network

Fisu (Finnish Sustainable Communities) is a network of Finnish municipalities committed to working towards becoming carbon neutral and waste-free and curbing overconsumption by 2050.

The municipality, businesses and other local operators build a common vision and roadmap to achieving these goals. They identify new ways of working and cooperation. The idea is to strengthen the municipal and regional economy, to create jobs and to promote sustainable wellbeing.

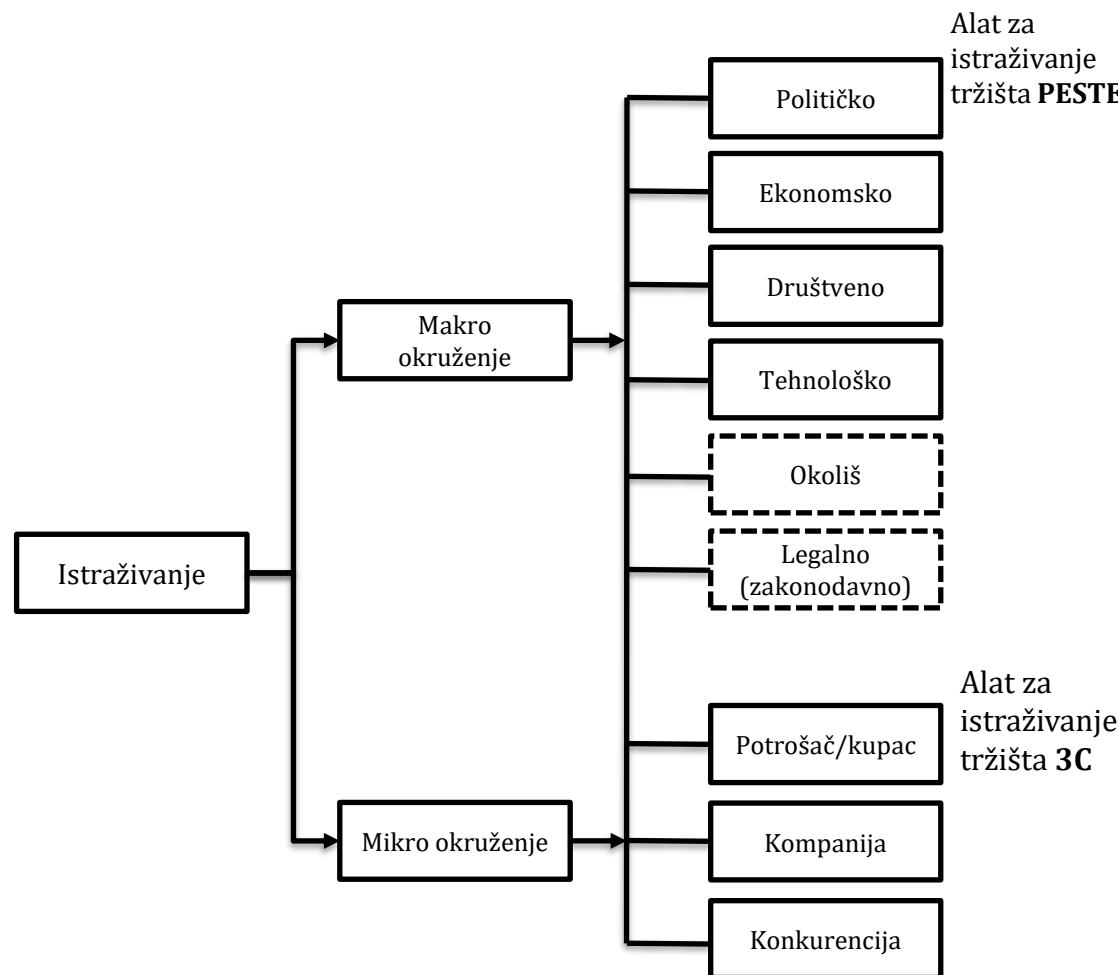

## NA ŠTA OBRATITI PAŽNJU – KORACI PRI IMPLEMENTACIJI

Praktični  
dio -  
nastavak

# ANALIZA TRŽIŠTA – osnovni alati

Najjednostavniji oblik istraživanja:

posmatranja („šta drugi rade“, supermarket, lokalne tržnice)

Šta kupci traže?

Koju sortu? Boju, veličinu, oblik

Cijene

Razgovarajte sa kupcima, pitajte ih šta bi kupovali, vodite evidenciju o tome!

# ANALIZA TRŽIŠTA – osnovni alati

| Internal | Strengths<br>(SNAGE)       | Weaknesses<br>(SLABOSTI) | Faktori unutarnjeg okruženja (interni)   | Faktori vanjskog okruženja (eksterni)  |
|----------|----------------------------|--------------------------|--|--|
| External | Opportunities<br>(PRILOGE) | Threats<br>(PRIJETNJE)   | <ul style="list-style-type: none"><li>• Vrijednosti</li><li>• Ciljevi, misija i vizija</li><li>• Struktura</li><li>• Kultura</li><li>• Ljudski resursi</li><li>• Tehnologija i resursi</li></ul> | <ul style="list-style-type: none"><li>• Tehnološki</li><li>• Politički/<br/>pravni</li><li>• Demografski</li><li>• Društveni</li><li>• Konkurentski</li><li>• Ekološki</li></ul> |

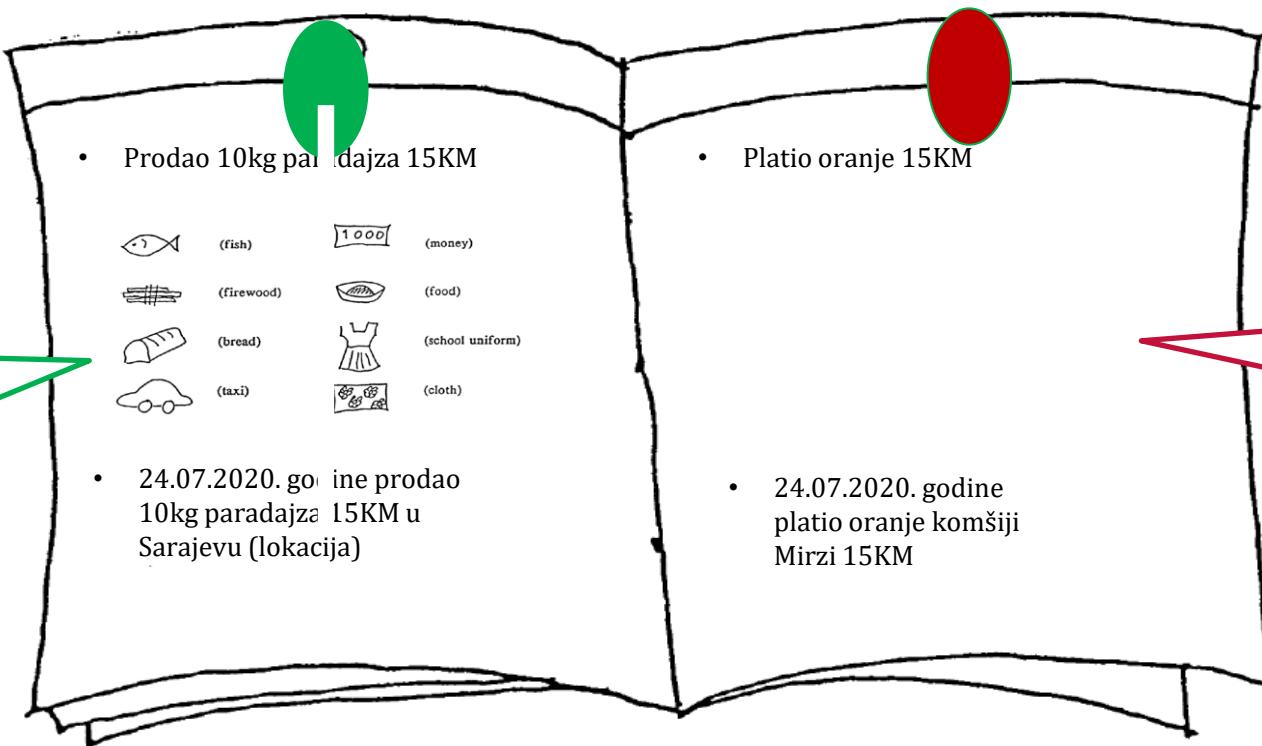

Ovu analizu naizgled veoma jednostavnu, treba uzeti za ozbiljno, udubiti se i definisati što je veći mogući broj snaga, slabosti, prilika i prijetnji.

Kada je dobro koristiti SWOT?

- uvijek!
- Prije nego krenete sa aktivnostima, novim idejama, i sl.
- Kada istražujete nove mogućnosti;
- Kada želite poboljšati postojeće stanje;
- Za procjenu trenutnog stanja;

# FINANSIJE

Jednostavnim zapisivanjem:

Svega od čega  
ste zaradili,  
odnosno dobili  
novac na lijevu

Svega što ste  
platili, odnosno  
dali novac na  
desnu stranu

Vremenom nadograđivati, proširivati informacije!  
Možete koristiti i simbole.

# FINANSIJE

Šta sve spada u prihode  
(prilive novca)?

- prodaja proizvoda;
- preprodaja proizvoda;
- pružanje usluga poput obrade zemljišta za koju ste dobili novac;
- ukoliko ste dobili kredit;
- ukoliko ste naslijedili novac;

Šta sve spada u rashode  
(odlive novca)?

- kupovina materijala;
- plaćanje usluga obrade zemljišta i sl.;
- plaćanje usluga prodaje proizvoda; zakupa zemljišta i sl.;
- rata kredita;
- pozajmica novca komšiji;

# FINANSIJE

- Govori nam po kojoj cijeni bi morali prodavati proizvode da pokrijemo troškove proizvodnje.
- Odnosno o količini proizvoda koje moramo prodati po datoј cijeni da bi bili na nuli, svaka naredna prodaja ostvaruje profit.

$$BEP \text{ prodaja} = \frac{\frac{UKUPNI FIKSNI TROŠKOVI}{1 - UKUPNI VARIJABILNI TROŠKOVI}}{UKUPNI PRIHODI}$$

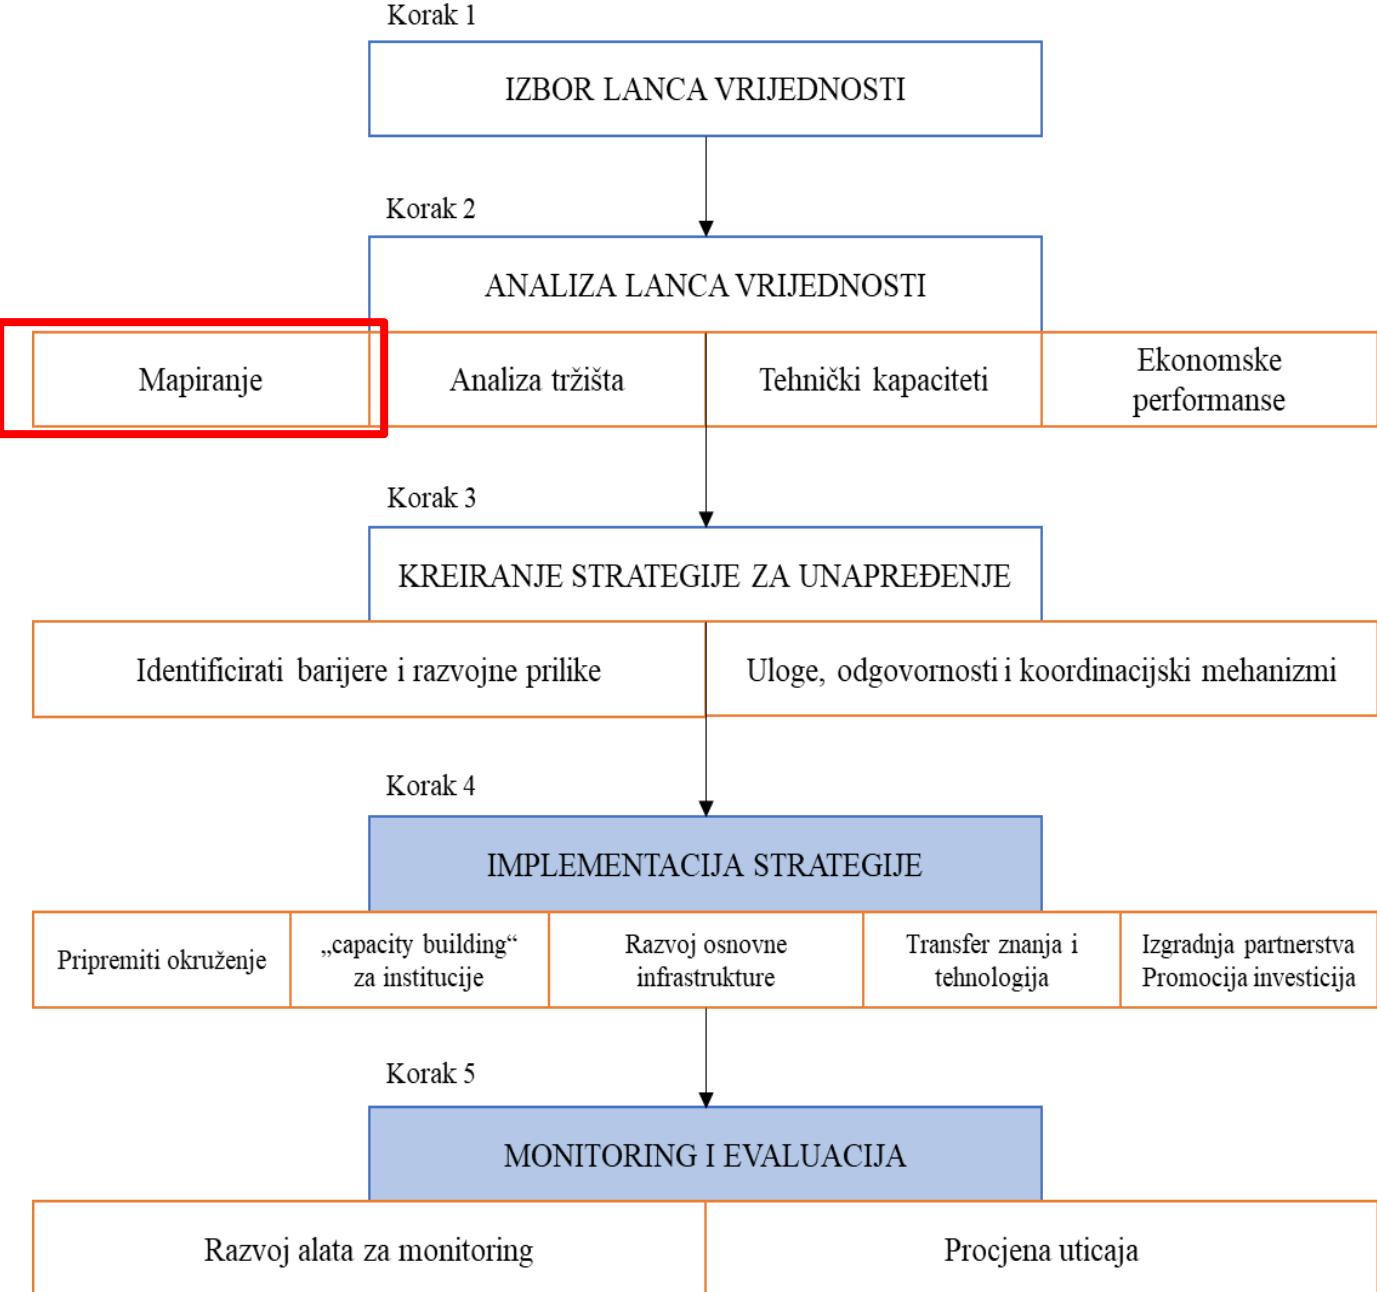

**Tabela 7.** Primjer kalkulacije i izračuna prelomne tačke pokrića

|                                  |             |
|----------------------------------|-------------|
| UKUPNO PRIHODI (UP)              | 20600       |
| prihodi od prodaje paradajza     | 20000       |
| poticaj                          | 600         |
|                                  |             |
| UKUPNO VARIJABILNI TROŠKOVI (VT) | 6200        |
| troškovi materijala              | 2000        |
| troškovi radne snage (povremena) | 1500        |
| troškovi goriva                  | 200         |
| troškovi đubriva                 | 500         |
| obrada zemljišta                 | 1500        |
| troškovi marketinga              | 500         |
| UKUPNO FIKSNI TROŠKOVI (FT)      | 8300        |
| plate radnika                    | 8000        |
| amortizacija traktora            | 300         |
| <b>DOBIT</b>                     | <b>6100</b> |
| prosječna cijena proizvoda       | 2           |
| BEP prodaja                      | 11873.61    |
| BEP količina                     | 5936.81     |

# ANALIZA VC

Šta je  
mapiranje  
„mapping“  
lanca  
vrijednosti?

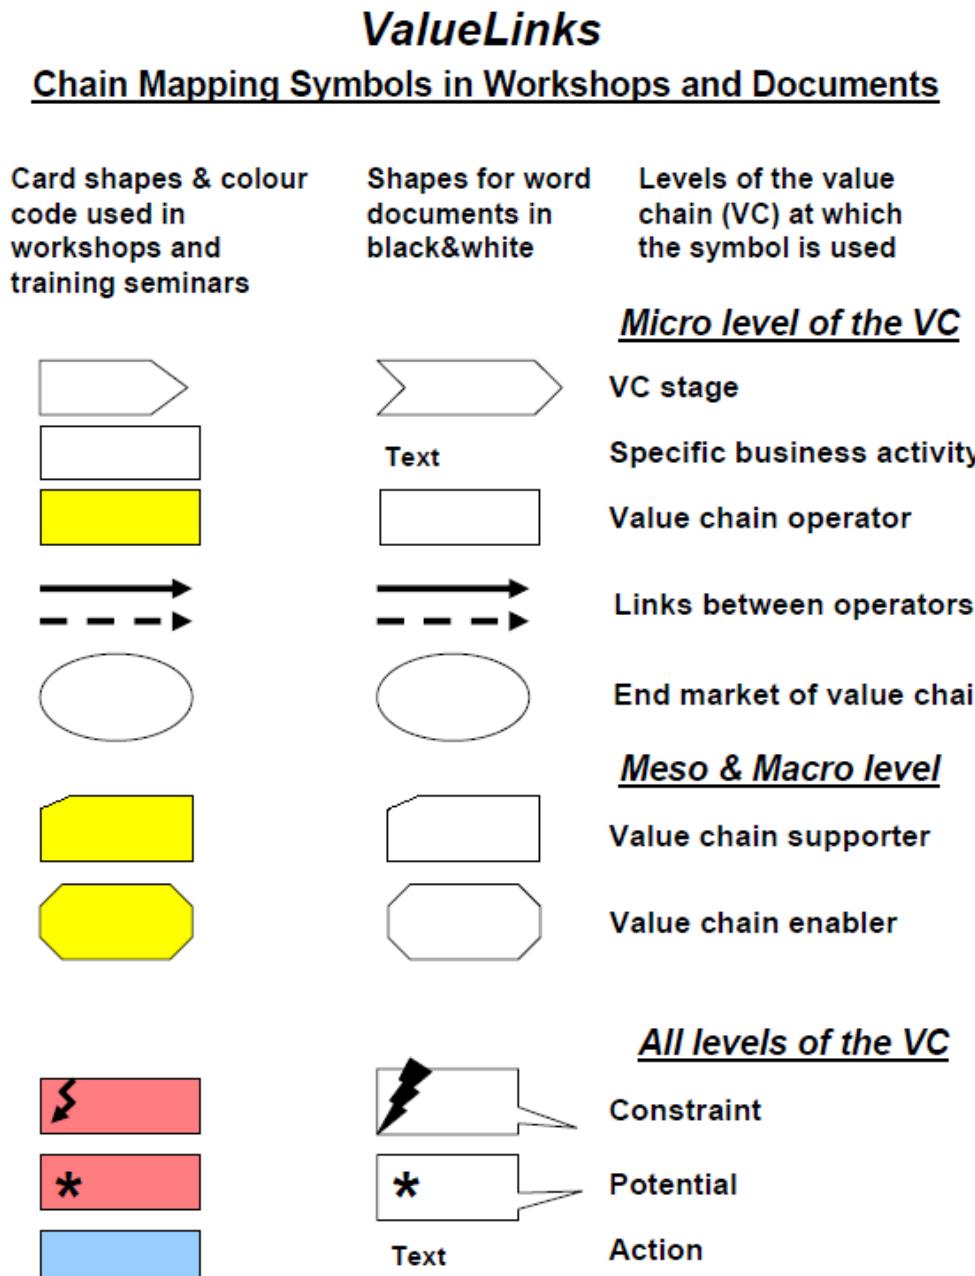

Brojne su definicije i tehnike ([ZA ČITANJE – Rother, M., & Shook, J. \(1999\). Value Stream Mapping.](#)) mapiranja lanca vrijednosti. Sumarno su elementi prikazani na narednoj šemi.

Šema 5. UNIDO pristup analizi lanca vrijednosti (UNIDO, 2009)

# ANALIZA VC – MAPIRANJE (OZNAČAVANJE)

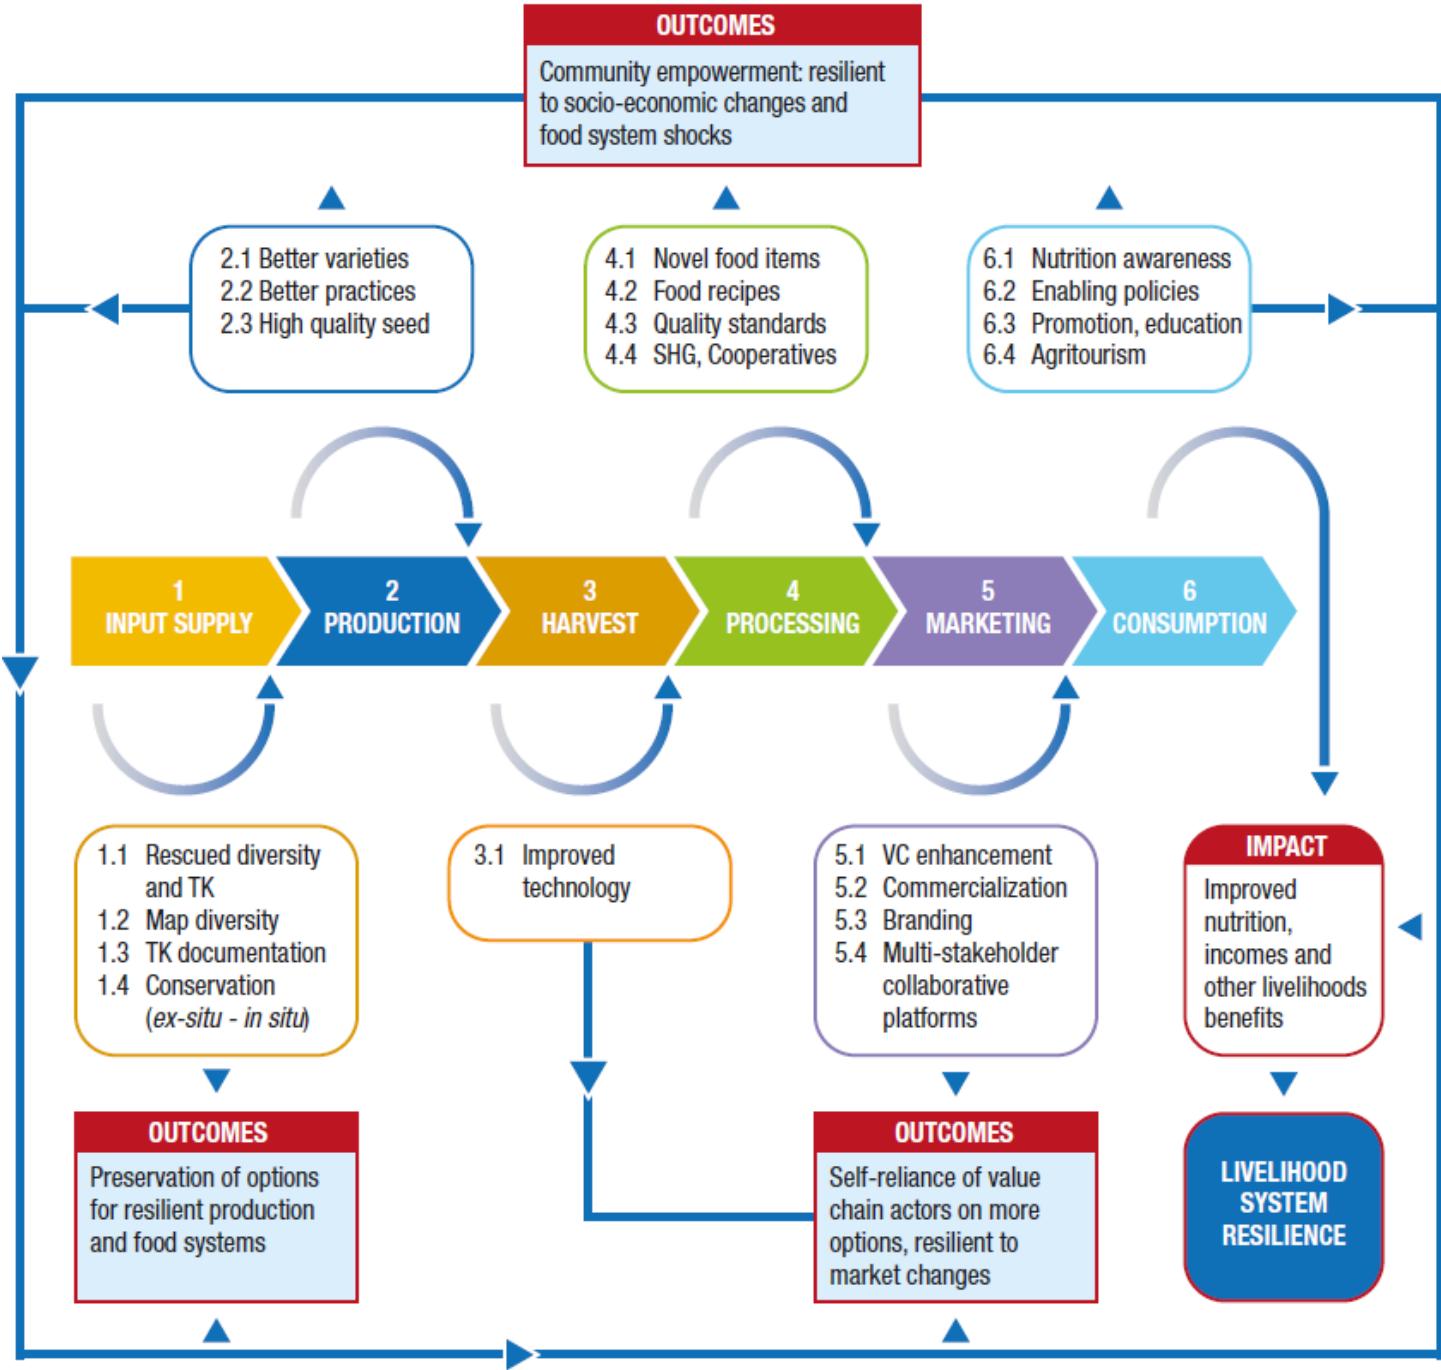

Od naročite je važnosti koristiti unificiran set simbola kako bi razlikovanje elemenata unutar lanca vrijednosti bilo jednostavnije, a uporedo i kako bi na vizuelno atraktivan način bile prikazane interakcije unutar lanca vrijednosti, barijere ili prilike, odnosno prikazali odnosi unutar VC.

Šema 7. Načini označavanja elemenata i odnosa unutar VC(Springer-Heinze, 2007)

# MAPIRANJE VC

Ovo je samo generalni okvir koji vam treba poslužiti kao vodilja prilikom identifikacije svakog od segmenata analiziranog lanca vrijednosti, a potom i identifikacije aktera, veza unutar istog.

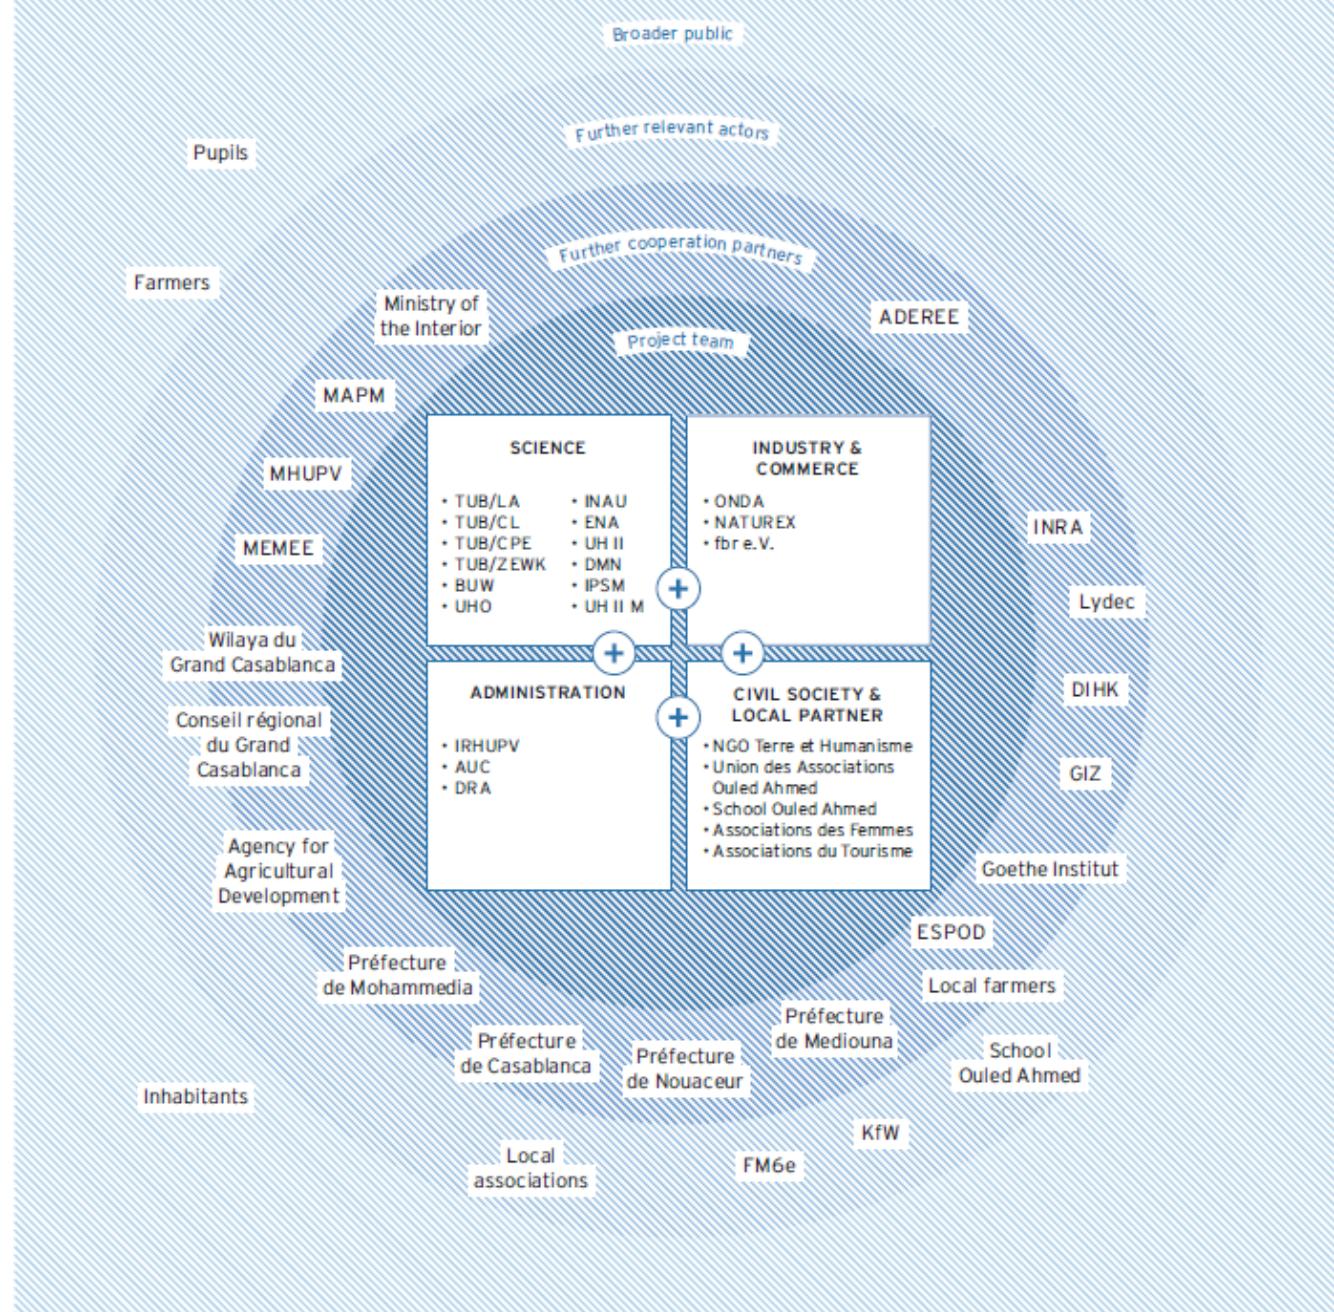

Šema 28. Holistički pristup VC

# MAPIRANJE VC – PRIMJER URBANA POLJOPRIVREDA

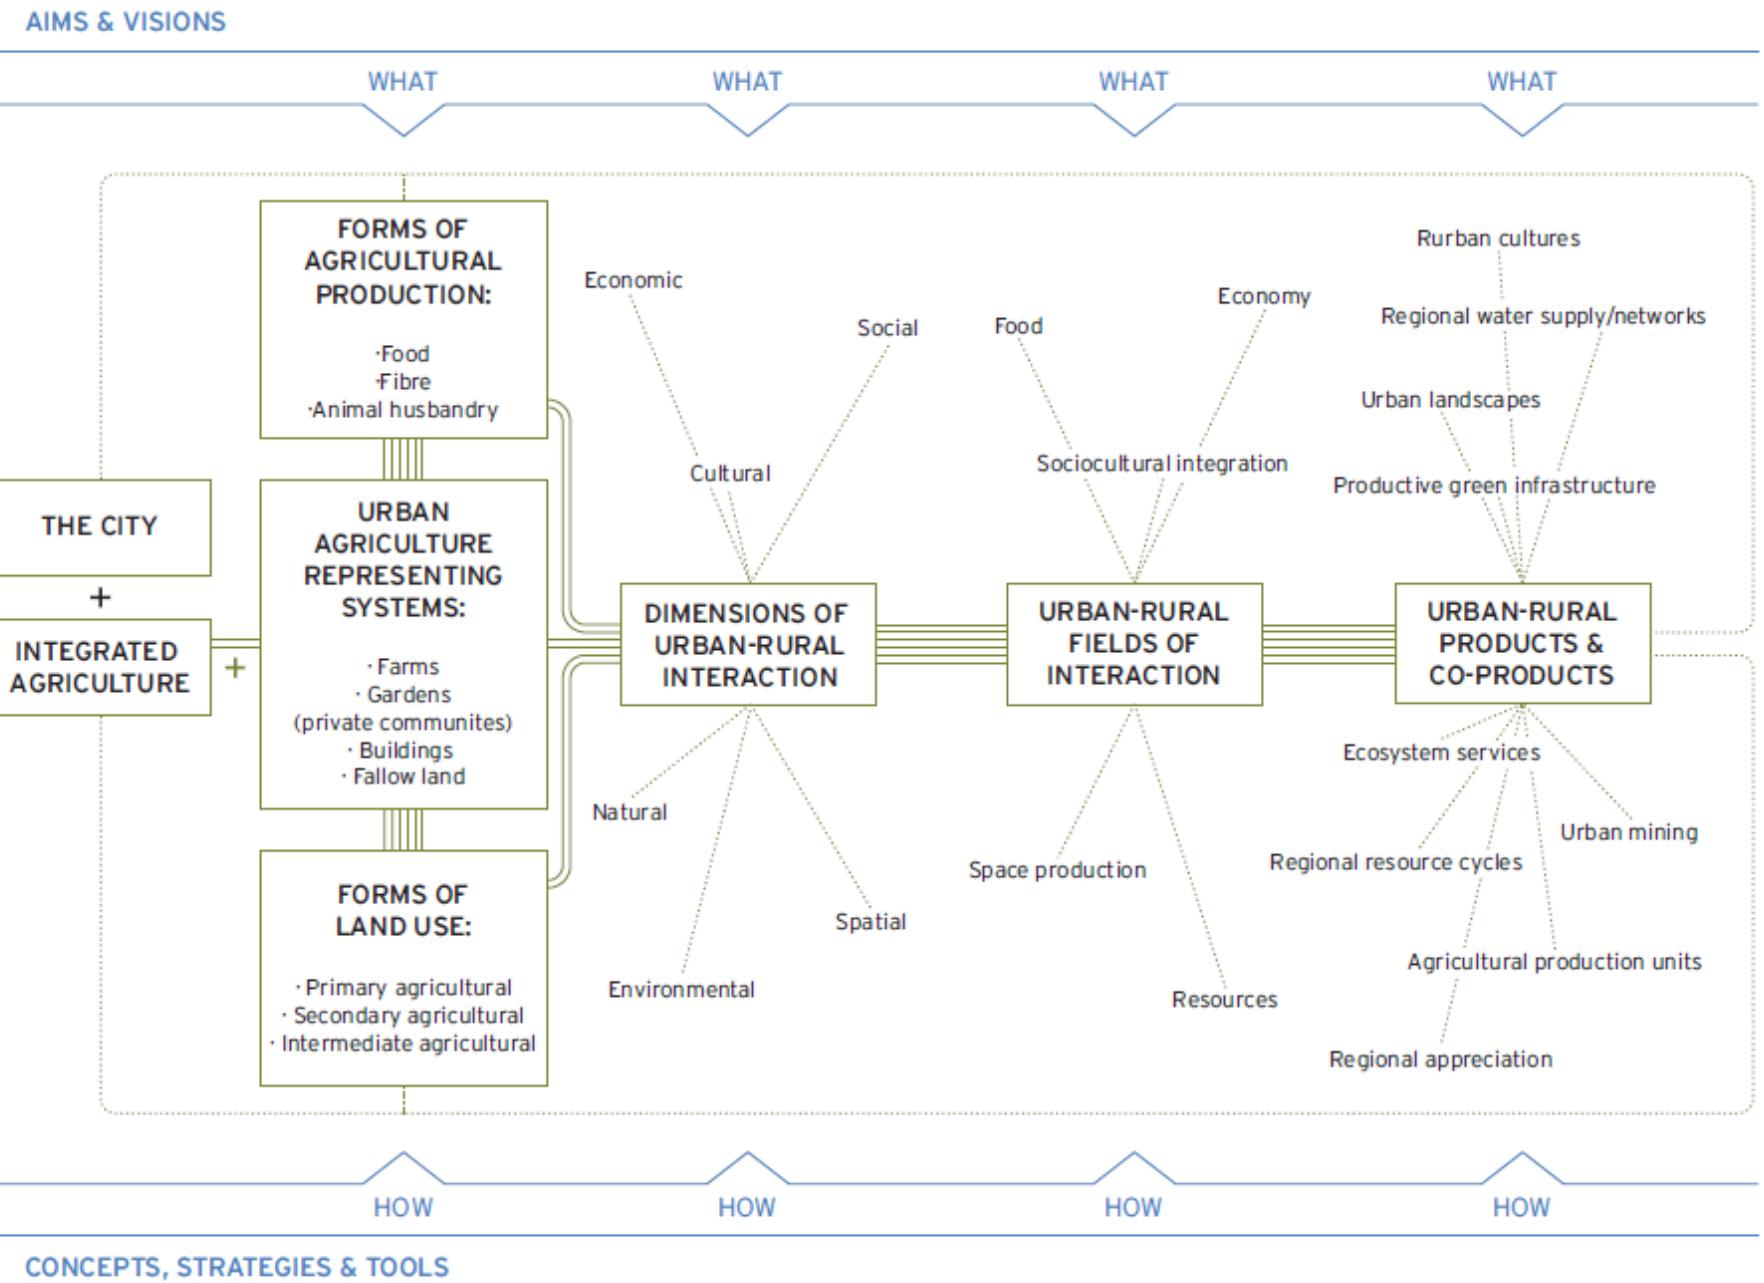

Mapiranje VC  
ovisi od svrhe  
analize, tako da  
struktura VC se  
može znatno  
razlikovati,  
„prilagodite“  
mapu vašim  
potrebama.

# FOOD DELIVERY 2.0

A new era in food delivery is rapidly emerging. 'Food Delivery 2.0' is shaking up both the food retail and foodservice sectors in the U.S. Although it is early days, we believe the ubiquity of the smartphone and the rise of the on-demand economy will have a profound and lasting impact on food, as it has in other spheres of our lives.

## DELIVERY APPS

These platforms have updated the old-school delivery model to the modern era, providing a mobile platform for centralizing ordering and delivery from a multitude of local restaurants.

DoorDash  
Grubhub  
Instacart  
Postmates  
UberEATS

## ONLINE GROCERY

New players have entered the grocery space, providing online ordering options and next-day or within-hours delivery of all types of grocery products.

AmazonFresh  
Door to Door Organics  
FreshDirect  
Peapod  
Thrive Market

## MEAL KITS

These subscription-based businesses deliver a box of pre-measured ingredients so that consumers can prepare their own home-cooked meals following the step-by-step recipe included in the box.

## READY MEALS

Ready-meal companies make complete meals and deliver them hot or chilled. Menu choices are often limited, but meals are designed and prepared by professional chefs.

## 5 Orders to Go

### Getting the last mile right

Having a cool app is not enough. Getting the logistics right—with ever-shrinking delivery times—is vital in making or breaking a business.

### Expect some shake-out

A lot of money is flowing into the sector. Not all will survive. Many of these companies are struggling to make the economics work.

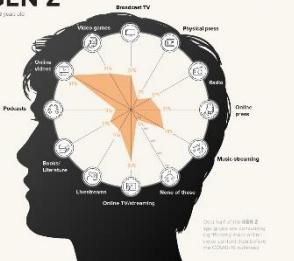

### A hot topic, but not total meltdown

Food Delivery 2.0 will lead to a total displacement of existing players. The new platforms will complement existing routes to the consumer.

## MEDIA CONSUMPTION IN THE AGE OF COVID-19

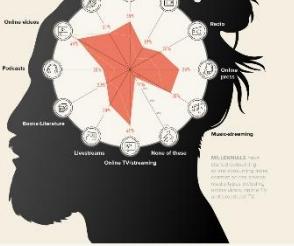

**MEDIA CONSUMPTION IN THE AGE OF COVID-19**  
With more time at home, media consumption has shifted. Here's how Gen Z, Millennials, Gen X, and Boomers are spending more time than ever.

**MEDIA CONSUMPTION GEN Z**  
16-24 years old

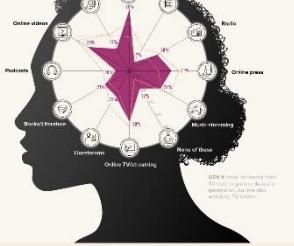

## MEDIA CONSUMPTION MILLENNIALS

25-37 years old

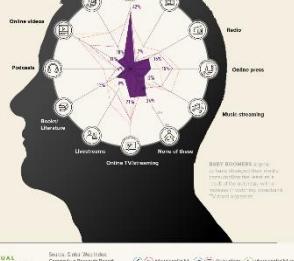

## MEDIA CONSUMPTION GEN X

38-50 years old

## MEDIA CONSUMPTION BOOMER

51+ years old

# ODREĐIVANJE DODANE VRIJEDNOSTI – VALUE PROPOSITION

Izvodljivost – kako se „stvari“ odnosno procesi i aktivnosti odvijaju unutar kompanije.

Prepoznatljivost – razumijevanje kupaca, motiva kupovine i kupovne odluke.

# ODREĐIVANJE DODANE VRIJEDNOSTI – VALUE PROPOSITION
